Written by leading Conflict of Laws scholars, *Conflict of Laws: Cases and Materials, Eighth Edition*, presents a balanced study of Conflict of Laws, otherwise known as Private International Law. The book begins with a discussion of traditional approaches to choice-of-law problems, both inter-state and international, followed by an examination of how modern courts and commentators have struggled to formulate new and better approaches. The remaining broad topics—constitutional limitations on choice of law, personal jurisdiction, conflicts in the federal system, recognition and enforcement of judgments, extraterritorial application of federal law, choice of legal regimes, and choice of law in complex litigation—are considered in light of the wisdom derived from consideration of the basic choice-of-law problems. New to the Eighth Edition: Addition of new co-author Carlos M. Vázquez, a leading scholar in Conflict of Laws as well as the adjacent fields of International Law and Foreign Relations Law Expanded coverage of Conflict of Laws in the international context, with a focus on the increasingly important topic of extraterritorial application of federal law New Supreme Court decisions on personal jurisdiction and constitutional limits on choice of law Expanded coverage of choice of law in marriage and divorce Discussion of draft Third Restatement of Conflict of Laws Professors and students will benefit from: A balance of historical and recent cases, with problems that test application of case precedents A balance between theoretical and practical aspects of Conflict of Laws, with coverage of state law and comparative perspectives where appropriate Focus on Choice of Law Broader coverage of extraterritorial application of federal law than any leading Conflict of Laws casebook Modern applications to internet disputes, complex litigation, party autonomy, and jurisdictional competition, among other cutting-edge topics

As a "Specialized Agency" of the UN, the World Intellectual Property Organization aims to be the premier global forum for intellectual property services, policy, information and cooperation. Whilst many individuals, firms, institutions and governments know and use WIPO services, the ways in which it functions, how priorities are set and decisions made are less well-understood. Indeed, a diversity of WIPO's stakeholders and member governments express frustration that WIPO's governance is not only complex but at times opaque. This practical guide offers a unique insight into how WIPO is governed,

described in clear, readily accessible terms for policymakers, scholars and stakeholders. The guide reviews the origins of WIPO and sets out its current functions and activities, presenting a framework for analysing WIPO's complex governance system. The core of the text will improve the reader's understanding of WIPO in five thematic areas: □ Legal foundations, mandate and purpose □ Decision-making structures, processes and practices □ Financial arrangements (such as income sources and the budget process) □ Mechanisms for accountability and control of the Secretariat (such as policies on oversight, audit and evaluation) □ Transparency and external relations. The text is accompanied by a number of valuable appendices, including key documents that have, to date, not been readily available to the public. Written by a leading WIPO commentator, *The World Intellectual Property Organization (WIPO): A Reference Guide* is the first comprehensive reference book to illuminate the nuts and bolts of WIPO governance. It will prove an invaluable and handy resource for those who interact with WIPO on any level, as well as to researchers seeking an introduction to how the organisation works.

Learn how Roger Newton, the co-discoverer of Lipitor, made an internal sale against all odds that championed the world's all-time best-selling drug. Meet Mark Roesler, CEO of CMG Worldwide, a firm that represents Elvis Presley, James Dean, Marilyn Monroe and hundreds of other departed celebrities. Gain valuable advice from storytellers Martin Shafiroff, America's number-one financial advisor; Bob LaMonte, a super sports agent who specializes in representing NFL head coaches; Dave Liniger, CEO of RE/MAX... It doesn't matter if you're a novice, a seasoned professional, or a high-powered CEO—your success depends on how well you sell your product, your service, your idea, yourself. Seasoned salesmen Robert L. Shook and Barry Farber interviewed top salespersons across a variety of industries and have written a collection of fascinating stories, each offering a lesson, valuable insight, or nugget of wisdom that will enhance your selling skills and boost your sales production. As you read these first-person narratives, you will feel as if they are talking directly to you, revealing valuable details behind their greatest sales moves, and imparting priceless lessons on how to sell your way to success. Most important, you can put their valuable insights to immediate use to boost your career.

"First published as *The past is a foreign country*, 1985"--Title page verso.

This book results from a conference held in Singapore in September 2009 that brought together distinguished lawyers and economists to examine the differences and similarities in the intersection between intellectual property and competition laws in Asia. The prime focus was how best to balance these laws to improve economic welfare. Countries in Asia have different levels of development and experience with intellectual property and competition laws. Japan has the longest experience and now vigorously enforces both competition and intellectual property laws. Most other countries in Asia have only recently introduced intellectual property laws (due to the Trade-Related Aspects of Intellectual Property Rights (TRIPS) Agreement) and competition laws (sometimes due to the World Bank, International Monetary Fund or free trade agreements). It would be naïve to think that laws, even if similar on the surface, have the same goals or can be enforced similarly. Countries have differing degrees of acceptance of these laws, different economic circumstances and differing legal and political institutions. To set the scene, Judge Doug Ginsburg, Greg Sidak, David Teece and Bill Kovacic look at the intersection of intellectual property and competition laws in the United States. Next are country chapters on Asia, each jointly authored by a lawyer and an economist. The country chapters outline the institutional background to the intersection in each country, discuss the policy underpinnings (theoretically as well as describing actual policy initiatives), analyse the case law in the area, and make policy prescriptions.
