Hi I have a 2003 60hp  
Yamaha outboard  
which is in great  
shape. Today when I  
went to full throttle it  
ran fine for a few  
seconds then slowed  
down and did this  
intermittently every  
few seconds. when it  
slows down it runs

smoothly, it does not chuggle. it is as if the throttle was reduced, then it picks up to full speed quickly and runs smoothly again for a few seconds.
