Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America ' s premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede ' s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid ' s, handle like a pro ' s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension ' s condition. He outlines testing procedures that will help you gauge how well you ' re improving your suspension, along with your riding. And, if you ' re inclined to perfect your bike ' s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

The most significant change in this edition of Leisure Education Program Planning is the infusion of information gleaned from writings by some of the leaders of the positive psychology movement. These readings provide valuable perspectives and insights about concepts related to leisure and leisure education. The book is organized into five sections. The first section contains six chapters designed to increase understanding of principles related to leisure and leisure education. The second section provides recommendations and research on leisure education, reviewing previous efforts to implement and understand leisure education programs. The third section provides considerations for developing the content (what to teach) of leisure education. The fourth section addresses the process (how to teach) of implementing leisure education programs. The final section of the book contains specific leisure education programs associated with six possible leisure education components (appreciate leisure, be aware of self in leisure, be self-determined in leisure, interact socially, use leisure resources, and make leisure decisions). The author has field-tested and evaluated various components of these leisure education programs.
