Check that the front and rear brakes operate properly on flat land. Setting Sag. To get the best performance with your FLOAT RPL/Triad shock, it is necessary to set sag: Locate the Schrader air valve on the shock and remove the valve cap. Screw the FOX High Pressure pump onto the air valve until the pump shows pressure on the gauge. Do not over-tighten the valve chuck.

I have a 2007 Specialized
Stumpjumper Comp with a Fox
Triad rear shock. The Triad
broke and I sent it off for
repair only to be told that
it will cost £120+ to
repair. Having looked on CRC
it seems I may be able to
buy a better shock for £60
more anyway so I am thinking
of doing this instead of
having the triad repaired.

is in fact a 7.5*2 shock that is internally limited to 1.8" travel with a nylon washer on the damper shaft (ie the oil side, so you have to disassemble the shock to mount it unless you think of a smart trick to construct a washer like that that can be mounted without needing to remove the head of the shock from the inner damper shaft).....

I understand the stock Fox Triad shock is 7.5" x 1.75", and read in another forum that the best replacement would be a Fox RP23 7.875" x 2.0"... to allow slightly further travel without the shock linkage hitting the frame. The reason for the replacement is that there is a lot of scoring on the bushings due to use.
