Department of Health | Australian Influenza Surveillance ...

The effectiveness of the 2017 seasonal influenza vaccine against presenting to a General Practitioner (GP) was preliminarily estimated to be low overall (33%), and lower against hospitalisation overall (16%). The overall effectiveness was skewed due to the relatively poor effectiveness measured against influenza A(H3N2) – the predominant strain. The effectiveness against GP presentation with influenza A(H1N1)pdm09 and B were estimated to be higher at 50% and 57%, respectively.

Normal.dot - Department of Health

The Public Health (Wales) Act received Royal Assent on 3 July 2017. The Act sets out provisions in a number of priority areas of public health policy, including obesity, smoking, 'special procedures' (such as body piercing, tattooing), pharmaceutical services, and toilets for public use.
