Crankcase ventilation (PCV) upgrade. A well-publicised problem with the Saab 9-3 and 9-5 Trionic 7 engines is failure of the positive crankcase ventilation system, leading to oil leaks and blocking of the oil pickup, and also contributing to the well-known sludging problem. An updated PCV kit was introduced by Saab to address these problems.

It's only \$75 for the new PCV system and the two additional hoses and takes about an hour to install. If you just bought a used 9-5 and you do not know the condition of your engine, then you should make sure your car has the latest PCV system and check your engine for sludge. The fastest way is to take off the valve cover and take a quick look.
