This book analyzes the key skills that a lawyer needs to handle a case effectively, a topic that is not covered coherently in any other book. At a time of rapid and wide-ranging change in the delivery of legal services, the current edition involves a complete reworking of the last edition of the book to take into account the implications of the implementation of the Jackson Review, and to see effective litigation clearly in the context of concerns about funding, case management by the court, costs, and the growing use of alternative dispute resolution. The book has a strong focus on the needs of the legal practitioner, the decisions to be taken at each stage of a case, and the criteria to apply in making those decisions. This is all securely based in references to relevant Civil Procedure Rules and decided cases, with checklists and commentary to assist in the project management of a case. The book also focuses on the skills a lawyer needs to work effectively. This includes skills in dealing with a client, drafting legal documents, and presenting a case in court. Throughout the work the emphasis is on demonstrating how to use law effectively, how to develop a case, and how to present persuasive arguments. Lawyers operate in an increasingly complex environment, faced with challenges in funding a case, in managing a case to avoid sanctions, and in using complex rules to best effect. The author addresses the use of legal knowledge and skills within this rapidly changing context, bearing in mind not least that the pace of change is likely to continue with the developing use of IT, and the widening use of alternative business structures. In putting together skills and law in a fully up-to-date context, A Practical Approach to Effective Litigation brings together the sound knowledge of the law and the legal skills an experienced litigator will use to get the best results for clients in a real-world context. It will be of use to anyone in the early years of legal practice, experienced solicitors who have had limited involvement with civil litigation, and those training to be a barrister or solicitor.

Written for professionals this easy-to-read text provides down-to-earth practical advice for those involved with training and skill development in technical software development jobs. The author, Mary Clarkson, draws on her experience as a technical specialist and as an IT training manager, and gives practical guidance on how to get staff members started on their skill development. She also explains, using plenty of examples, how to support them through their learning process. Clarkson has worked 7 years as IT Training Manager of Barclaycard UK and has over 14 years of practical experience developing computer systems. No doubt, this book is of indispensable value to: team leaders, project manager, systems developers, and human resource managers.

The successful first edition of HACCP: A Practical Approach has established itself as the definitive text on HACCP for the food industry. In an easy to read style, it gives a step-by-step approach to developing an effective HACCP system. In this new edition authors bring us up to date with current thinking, including the use of more modular HACCP systems and even generic HACCP in some sectors. Greater attention is paid to planning and implementation, and the theory is illustrated with a completely new set of case studies from UK, Ireland, USA, Canada, South America and Asia. It is an invaluable text for everyone who needs to know what HACCP really is, what it can do for a food business, and the best way to build an effective system.
