Burns are one of the most devastating conditions encountered in medicine. The injuries affect people of all ages, both physically and psychologically, in the developed and the developing world. The correct management of burns needs a skilled multidisciplinary approach and this ABC provides an overview of the most important aspects of burn injuries for healthcare professionals. This ABC book offers a comprehensive yet accessible review of burn management. It introduces the range of burns that a GP may become involved in treating or having treated at hospital. From explanations of how burns happen, through to first aid applications, pre-hospital treatment, dressings, resuscitation and the management of deep dermal burns. It also looks at the subsequent management of burns through hyperalimentionation and microbiological management, reconstruction and rehabilitation. A significant contribution to an important area of care: burns are the second most common cause of accidental death in children in the UK. Early treatment of burns is essential to avoid disablement: impact on lungs, infection and later need for plastic surgery can all be reduced by appropriate assessment and prompt treatment. Includes contributions from the UK, USA and Australia, and has a chapter on international disasters. Presented in a clear and concise manner with many illustrations, this book will appeal to a wide readership including medical students, nurses, hospital doctors, and general practitioners.

Stroke is the most common cause of adult disability and is of increasing importance within ageing populations. This brand new title in the ABC series covers the entire patient journey, from prevention through to long-term support. It includes primary prevention and management of risk factors for stroke and secondary prevention including pharmaceutical, lifestyle and surgical intervention. The general principles of stroke rehabilitation are also addressed as well as mobility, communication and psychological problems, as is stroke in younger people. It also covers long-term support for stroke survivors and their carers. This is an invaluable and practical guide to all aspects of stroke for both health care professionals and lay audiences. It is of particular relevance to general practitioners, junior doctors, nurses and therapists working with stroke patients and their carers, and to people with stroke and their families. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store.

An understanding of current trauma imaging concepts is essential for all medical personnel involved in the care of trauma patients where the outcome may depend on a rapid assessment of the nature and severity of injuries, allowing appropriate medical management and surgical or

non-surgical intervention. Containing more than 300 state of the art full colour images, the ABC of Imaging in Trauma addresses this increasingly important area and provides a concise and practical guide to the role, performance and interpretation of emergency imaging procedures in disaster victims and major trauma patients, and focuses on the use of CT, ultrasound, and MRI scanning to diagnose such patients. It is ideal for the non specialist and emergency physicians, Foundation doctors, trainee radiologists, and specialist trauma nurses. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store.

A practical guide to the diagnosis and treatment of acute symptoms and conditions, the ABC of Emergency Differential Diagnosis provides a step-by-step guide to emergency differential diagnosis for non-specialists in a hospital or primary care setting. This new title in the ABC series covers the assessment, diagnosis, treatment, and management of the most common symptoms with 'walk through' diagnosis, clear learning outcomes, and easy to find treatment options. Using the familiar problem-based teaching approach for rapid assimilation of information, case studies in each chapter allow the reader to be sure that they have synthesised the information given and can apply it to clinical cases.

"This brand new title in the ABC series provides a comprehensive overview of pre-hospital medicine, including transport, patient assessment, emergency care systems, and pre-hospital interventions. With pre-hospital care being the start of the "trauma chain", the treatment patients receive on-scene as well as en-route can be life-saving, and this new title is invaluable for all staff involved in emergency and pre-hospital medicine"--Provided by publisher.

ABC of Wound Healing ABC of Wound Healing, Second Edition ABC of Wound Healing is a practical, highly illustrated guide to assessment, diagnosis and management of all common types of acute and chronic wounds. This concise yet comprehensive reference covers all essential aspects of wound healing care, including epidemiology, pathophysiology, assessment, treatment, long-term management, and prevention. This revised second edition contains several new chapters on lymphoedema, nutrition, skin care, continence, and scarring. Updated and expanded chapters cover a wider range of devices and therapies, and discuss additional factors that impact wound healing processes, offering new clinical photographs as a visual guide. Applying a multidisciplinary approach to the provision of wound care, ABC of Wound Healing: Covers common wounds including traumatic wounds, surgical wounds, diabetic foot ulcers, pressure injuries, and venous and arterial leg ulcers. Emphasises the importance of reaching a diagnosis, the fundamental step in managing any wound. Provides up-to-date information on physical, chemical, biological and emerging therapies for patients with various types of wounds. Contains hundreds of full-colour illustrations and clinical photographs of wounds and treatments. ABC of Wound Healing, Second Edition, remains a must-have guide for junior doctors, specialist registrars in medicine and surgery, specialist nurses, general practitioners and medical students.

Coronary artery disease (CAD) causes severe disability and more death than any other disease in affluent societies, including cancer. The medical conditions associated with it are angina, ischaemia, unstable angina, myocardial infarction, arrhythmias, heart failure and sudden death. Choosing the appropriate investigation to confirm a diagnosis helps to assess
