Forget what you know about the world of work You crave feedback. Your organization's culture is the key to its success. Strategic planning is essential. Your competencies should be measured and your weaknesses shored up. Leadership is a thing. These may sound like basic truths of our work lives today. But actually, they're lies. As strengths guru and bestselling author Marcus Buckingham and Cisco Leadership and Team Intelligence head Ashley Goodall show in this provocative, inspiring book, there are some big lies--distortions, faulty assumptions, wrong thinking--that we encounter every time we show up for work. Nine lies, to be exact. They cause dysfunction and frustration, ultimately resulting in workplaces that are a pale shadow of what they could be. But there are those who can get past the lies and discover what's real. These freethinking leaders recognize the power and beauty of our individual uniqueness. They know that emergent patterns are more valuable than received wisdom and that evidence is more powerful than dogma. With engaging stories and incisive analysis, the authors reveal the essential truths that such freethinking leaders will recognize immediately: that it is the strength and cohesiveness of your team, not your company's culture, that matter most; that we should focus less on top-down planning and more on giving our people reliable, real-time intelligence; that rather than trying to align people's goals we should strive to align people's sense of purpose and meaning; that people don't want constant feedback, they want helpful attention. This is the real world of work, as it is and as it should be. Nine Lies About Work reveals the few core truths that will help you show just how good you are to those who truly rely on you.

"This is a collection of 24 essays about why how Human Resource Management professionals can develop people passion in organization"--

"Rather than explain the power of recognition in a typical business book, Novak decided to write a fun story that draws on his real-world experiences at Pepsi and Yum! Brands, as well as his personal life"--

The author argues that the roles of human resource professionals must be redefined to meet the competitive challenges organizations face today and into the future. He provides a framework that identifies four distinct roles of human resource professionals: strategic player, administrative expert, employee champion, and change agent. He includes many examples to demonstrate that human resource professionals must operate in all four areas simultaneously in order to contribute fully. He urges a shift of these professionals' mentality from "what I do" to "what I deliver" and makes specific recommendations for how individuals in human resources can partner with line managers to make organizations more competitive.

Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere - and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons - but resistance to rapid change is a big one, Gallup's research and experience have discovered. In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers' unique demands. Gallup's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based organizations to unleash workers' potential; and hire great managers to implement the positive change their organizations need not only to survive - but to thrive.
