Despite slow progress in use, mediation continues to consolidate its presence in dispute resolution. This important book argues that a more favourable socio-legal climate must be created for mediation to thrive, and accordingly analyses the legal, cultural, social, systemic and spatial aspects of the use of mediation in the legal practice of the different countries of the European Union (EU). Based on a spatiotemporal analysis and models of mediation in the EU, it pinpoints the social and cultural reasons for the fragmentation of its legal regulation and shows what paths are available to promote the effective implementation of mediation in social practice. It is the first book to capture the socio-legal context of mediation. A spatiotemporal analysis of the extent of use of mediation in a region as large and at the same time as diverse as the EU has never been carried out before. Using various methodological and conceptual approaches to analyse the legal and social aspects of introducing mediation to legal systems, the authors | all with long-term experience in the exercise and research of mediation directly in the field | provide invaluable insights into such facets of the use of mediation as the following: the social context that raises the need for mediation; obstacles to the wider use of mediation in resolving disputes between parties; the effects of social influences reflected in legislation that shape the laws of each country; the basic models that make up the system of access to mediation in specific EU Member States; the role of law as a tool for social change and its reflection in the legal regulation of mediation; and perspectives for further development of mediation in the EU. The legislative efforts proposed to enhance the regulation of mediation in EU countries are based on modern knowledge of law, sociology and psychology. As a unique combination of exploration of the theoretical determinants of mediation and an empirical study of the extent of its use in the European area, this book's fundamental contribution to the legal theory and practice of mediation is inarguable. Its analysis of mediation from three perspectives | as a means of improving citizens' access to justice, as a means of applying social justice in society, and as a means of restorative justice | are of the utmost value in today's global society. For users of mediation, EU institutions involved in mediation, EU Member State authorities addressing the issue of mediation, and the wider dispute resolution community worldwide, the book will be welcomed for the giant steps it takes toward refining arguments for the promotion of mediation and its development, in theory, research and practice.

"This engaging collection gathers theoretical and empirical insights from leading family policy experts. The authors - representing diverse countries, disciplines, and methods - bring to life the volume's innovative conceptual framework, which is organized around policy institutions, both public and private. The volume closes with a call for new lines of research that should inform family policy scholars for years to come."--Janet Gornick, Professor of Political Science and Sociology, and Director of the Stone Center on Socio-Economic Inequality, The Graduate Center, City University of New York, USA "Featuring exciting contributors from a range of often-siloed scholarly disciplines, countries and cultures, this Handbook offers nuanced insights into how interacting societal inequality factors influence family policy enactment to reinforce or improve inequality outcomes across gender, class, and nations. It is ambitious, broad-reaching, and succeeds in providing a strategic view within and across nations to inspire thoughtful evidence-based policy implications to improve societies in the future." - Ellen Ernst Kossek, Basil S. Turner Professor of Management, Purdue University, USA This open access handbook provides a multilevel view on family policies, combining insights on family policy outcomes at different levels of policymaking: supra-national organizations, national states, sub-national or regional levels, and finally smaller organizations and employers. At each of these levels, a multidisciplinary group of expert scholars assess policies and their implementation, such as child income support, childcare services, parental leave, and leave to provide care to frail and elderly family members. The chapters evaluate their impact in improving children's development and equal opportunities, promoting gender equality, regulating fertility, productivity and economic inequality, and take an intersectional perspective related to gender, class, and family diversity. The editors conclude by presenting a new research agenda based on five major challenges pertaining to the levels of policy implementation (in particular globalization and decentralization), austerity and marketization, inequality, changing family relations, and welfare states adapting to women's empowered roles
