staff members, and make math an important part of school life. You'll also learn how to: Create a safe and inviting environment for mathematics instruction; Devote adequate amounts of instructional time to help students develop their skill set as proficient mathematicians; Use real-world contexts and hands-on instruction to boost engagement; Give students the tools and opportunities to be confident, to question, to take risks, and to make mistakes; And much much more!

You had better not monkey around when it comes to place value. The monkeys in this book can tell you why! As they bake the biggest banana cupcake ever, they need to get the amounts in the recipe correct. There's a big difference between 216 eggs and 621 eggs. Place value is the key to keeping the numbers straight. Using humorous art, easy-to-follow charts and clear explanations, this book presents the basic facts about place value while inserting some amusing monkey business.

"Your charts don't need to be perfect, just thoughtful. You don't even have to be able to draw. Just put the child before the chart." - Marjorie Martinelli and Kristine Mraz Listen to an interview with Marjorie and Kristi, the Chartchums, on Education Talk Radio. Commercially available charts leave you hanging? Want the secret to jump-off-the-wall charts that stick with kids? Trust Smarter

Charts. Did you ever want to know: What do great charts look like? How many is too many? Where are the best places for them in my classroom? How long do I keep them? How do I know if they are working? Then you'll want to meet Marjorie Martinelli and Kristine Mraz, the Chartchums. They struggled with the same questions, and Smarter Charts shares not only the answers, but the best practices they've discovered as well. Amp up the power of your charts with tips on design and language, instructional use, and self-assessment. Even better, discover surprising strategies that deepen engagement, strengthen retention, and heighten independence—all by involving students in chart making. Packed with full-color sample charts from real classrooms, Smarter Charts shares simple, brain-based strategies proven to make your classroom an even more active, effective space for literacy instruction and classroom management.

"An activity-based volume that introduces early-level physical science concepts, including the properties of matter, structure of matter, states of matter, physical and chemical changes to matter, compounds and elements, and the periodic table. Features include a glossary, an additional resource list, and an index"--
