This color atlas is a practical pictorial guide to the diagnosis of skin and nail conditions of the lower extremities. It features more than 1,000 detail-revealing full-color clinical photographs of over 100 common and uncommon lesions, grouped into easy-to-follow categories. The succinct text accompanying each photograph explains the lesion's salient features and, whenever possible, provides a differential diagnosis. Therapeutic recommendations offered include new treatments for fungal nails and for scars. The opening chapter, on general principles, includes a classification with an algorithm and a problem-oriented algorithm. Subsequent chapters cover the entire gamut of disease entities--eczema; contact dermatitis; drug and toxic reactions; papulosquamous diseases; benign tumors; premalignant and malignant tumors; bacterial, viral, and fungal skin infections; infestations, parasites, and bites; developmental disorders; manifestations of internal disease; manifestations of circulatory disease; sweat and associated disorders; mechanical injuries; psychocutaneous disorders; nail disorders; and scar conditions.

This atlas, containing more than 300 color photos, focuses on those dermatologic conditions that are most common in ethnic skin or skin of color. It includes succinct explanations of each disease process, describes clinical findings and presents key information on diagnosis and treatment. Individual chapters are devoted to pigmentary disorders, follicular disorders, hair and scalp disorders, eczemas, papulosquamous disorders, granulomatous disorders, connective tissue diseases, infectious diseases, scarring disorders, cutaneous neoplasms, photodermatoses and drug eruptions. The fact that this atlas covers skin disorders that affect patients of all ethnic backgrounds ensures that it will be of worldwide relevance. It will serve as a valuable reference for dermatologists and a range of other health care providers.
