Kjell A. Doksum is a senior scientist in the Department of  
Statistics at the University of Wisconsin–Madison. His  
research encompasses the estimation of nonparametric  
regression and correlation curves, inference for global  
measures of association in semiparametric and  
nonparametric settings, the estimation of regression  
quantiles, statistical modeling and analysis of HIV data, the  
analysis of financial data, and Bayesian nonparametric  
inference.

A handy trick for some estimation problems, like say mixtures) but they are too few to suppress the weaknesses. For contemporary courses the Casella and Berger book is widely used and although not a complete textbook either, (you would need references for it too) it is much more useful than Bickel and Doksum.
