Using Foucaultian perspectives The Birth of the Museum explores how the public museum should be understood not just as a place of instruction, but as a reformatory of manners in which a wide range of regulated social routines and performances take place. This invigorating study enriches and challenges the understanding of the museum, and places it at the centre of modern relations between culture and government.

Most museums are built around a collection, and our journey starts in the 16th century with the so-called 'cabinet of curiosities'. Composed of rare and unusual objects, they were collected with the purpose of being preserved and interpreted to ultimately offer an understanding of the world. Their owners, some of the first systematic collectors, were
