Branemark Implant System: Clinical and Laboratory...
A total of 907 Brånemark System Mk III TiUnite/Groovy implants were placed in 115 male patients and 127 female patients by dentists of the Department of Oral and Maxillofacial Surgery, Kobe University Graduate School of Medicine, between July 2003 and December 2013. These implants were investigated in this study.

Survival of Brånemark System Mk III implants and analysis...
Since Brånemark found that osseointegration occurred between titanium and bone in the mid-1960s, several studies have investigated titanium dental implants and their clinical applications. The functional and esthetic restoration of edentulous areas using dental implants is now considered a desirable treatment option.
