In the not-too-distant future, in what was once the old City of New York, megacorporations have taken over everything. Now even the internet is owned, and the only way to transmit sensitive information is by a network of highly skilled couriers called "data runners" who run it over the sneakernet. It is a dangerous gig in a dirty world, but Jack Will doesn't have much choice in the matter. A brilliant young math whiz and champion of parkour, Jack must become one of these data runners in order to get his father out of a major gambling debt. When a mysterious stranger loads Jack's chip with a cryptic cargo that everybody wants, he soon becomes the key figure in a conspiracy that could affect the entire North American Alliance. Now it's all up to Jack. With the help of his best friend, Dexter, and a girl who runs under the name Red Tail, Jack will have to use all his skills to outrun the retrievers and uncover the truth before they catch him and clip him for good.

Six years and 75,000 miles ago I bought a Harley and re-entered the world of motorcycles at the age of 55, and I have been having a blast ever since! I also have made every beginner mistake in the book. Wait a minute, what book? There is no beginner mistake book. Well, there is now and I wish I would have had it six years go.I wrote this book so you can cash in on my experiences and save yourself time, money and hassle. Crammed with beginner mistakes, tips, how-to's and resources, it has what every new or re-entry rider needs to know about riding and gear. It's got all of the stuff they didn't tell you about selecting a starter bike, minimizing risk, riding safety, using the "friction zone", going where you look, buying the right gear the first time and many more basic rider topics. It is easy to read, well organized and laced with a little off-beat humor to make it fun.The single best thing I did when I started riding was to go through the MSF Basic Rider course. The next best thing I could have done would have been buying this book. Reading this book can minimize your learning curve and enable you to start really enjoying your motorcycle today.

Through wonderful readings and carefully designed activities, this best-selling series helps students develop reading skills and systematically increase their active vocabulary. Learners develop useful and relevant vocabulary while exploring and expanding critical thinking skills.

Get Peak Performance from Two-Stroke Engines Do you spend more time trying to start your weed trimmer than you do enjoying your backyard?
