In Peter Read Miller on Sports Photography, the 20-year Sports Illustrated veteran photographer takes readers into the action of many of his most iconic shots, sharing the stories behind the photos of some of the world's greatest athletic events. Miller discusses the circumstances surrounding particular shots, shares observations of the athletes themselves, and provides key techniques for sports photographers of all levels who are looking for tips on getting great photos of football, track and field, gymnastics, swimming, and portraits. Each chapter includes at least one gallery of photos that showcase Peter's images while illustrating the technical points he is discussing in that chapter. Unlike photo collections by other greats of sports photography, Miller's book seamlessly interweaves his images with the stories behind the shots, photographic instruction, and his inside look at what it's like to work at the nation's leading sports publication. Beautifully illustrated with Miller's images of the Olympics, football, and portrait sessions with professional athletes, Peter Read Miller on Sports Photography offers a rich and inspiring experience for all photographers, especially sports photographers; as well as sports fans and Sports Illustrated readers.

Sports Illustrated sent writer Alexander Wolff and photographer Damian Strommeyer to cover the end of an era in Hoosier Hoops -- the end of the state's one-class postseason tournament. They were asked to capture in spare prose and black-and-white images the mood of a typical Indiana town as it prepares to bury a part of its heritage. A March for Honor is the result of that journey -- Wolff and Strommeyer transport the reader to Batesville, and take the reader through Batesville High's journey through the tournament. Rich with history and drama, "A March for Honor is not only a tale for basketball fans, but an elegy for anyone who treasures a small-town America that is rapidly disappearing.

Features the electronic book "Disaster on Green Ramp: The Army's Response" by Mary Ellen Condon-Rall of the Center of Military History in Washington, D.C. Discusses a plane crash and massive fire at Pope Air Force Base, North Carolina, that killed or injured more than 100 paratroopers in 1994.

Photographer, author, and educator Roberto Valenzuela has a proven track record for teaching and explaining difficult concepts to photographers of all skill levels. His remarkable ability to break down complicated ideas into understandable, approachable elements that photographers can truly grasp -- and then use their newfound knowledge to improve their photography -- made his first book, Picture Perfect Practice, a breakout success. In Picture Perfect Posing, Roberto takes on the art of posing. For many photographers, after learning to compose an image and even light it properly, a portrait can still easily be a failure if the pose is not natural, elegant, and serving the needs of both the subject and the photographer. Instead of just showing page after page of poses -- like most posing books on the market -- Roberto actually breaks down the concept of posing by examining the anatomy, starting with the core foundation: the spiral chord and neck. Building from there, Roberto discusses every component of what makes poses work, as well as fail. How should the model hold her hands? Bend her elbows? Position her fingers? Should the model look toward or away from the camera, and why? It all depends on what the photographer wants for the shot, and Roberto discusses the entire process, from the intent of the photographer through the execution of the pose. For those who have been discouraged by an inability to pose their subjects, or who have simply not known where to start in order to "figure it out," Picture Perfect Posing is the essential resource they need to learn how posing truly works, and how they can learn to direct the exact pose they need for the shot they want.
