In her widely acclaimed *Doing Things*, Jitka M. Zgola offered practical and much-needed advice for those caring for persons with Alzheimer disease. Now, in *Care That Works*, Zgola shows how caregivers can better meet the demanding challenges of their job by building and improving their personal relationships with those in their care. Instead of simply prescribing approaches, *Care That Works* gives caregivers the information with which they can develop their own approaches, evaluate their effectiveness, and continue to grow in skill and insight. Zgola explains that optimal dementia care involves three elements: a good relationship between the caregiver and the person who has dementia, a safe and nurturing environment, and meaningful activities. Evident throughout the book is Zgola's gift for compassionately portraying the difficulties faced by people with dementia and then suggesting ways to act in a manner that accords such people the respect and dignity they deserve. ACHIEVE HEALTH & HEALING AS A TEAM The patient-doctor bond is on faulty ground, and healthcare happiness is elusive. According to Dr. Ken Redcross, it doesn't have to be this way. He believes that when patients and doctors establish essential qualities in their relationship, a strong patient-doctor bond will result. Isn't that what you want as a patient—a trusting, respectful, communicative, and empathetic bond with your doctor? It's what virtually any patient wants, and as Dr. Ken assures you, it's what most doctors want, too. In *Bond*, Dr. Ken presents the four cornerstones of an unshakeable patient-doctor relationship, offering key insight and advice to help you—and your doctor—get on the same page. No relationship can survive for very long without trust, healthy communication, mutual respect, and a willingness to empathize. This book shows you how these four qualities play out at the doctor's office and how you can implement and strengthen them—on both sides of the stethoscope. With special doctor-to-doctor features, Dr. Ken invites colleagues to try out what works for him. He also offers personal anecdotes about how he makes every effort to practice what he preaches. Following a quick doctor-patient relationship assessment, *Bond* closes out with a "one-on-one conversation" with Dr. Ken. Here he shares some of his thoughts surrounding common patient questions to help you broach similar topics with your own doctor. With *Bond*, you will learn that it is possible to bring happiness, and even love, back to your patient-doctor relationship. Visit www.drredcross.com or www.redcrosswellness.com
