How to hard reset Cisco 881. For routers from the "Linksys by Cisco series" Resetting your router to factory defaults 1. Find the router reset button located on the back of the router. 2. Press and hold the Reset button for 10 seconds. If holding the button for ten seconds did not hard reset the router, try holding the button for 30 seconds.

How to hard reset Cisco 881 - routers-reset.info

A Cisco C881-K9. Our previous router was a home model and not suited for our needs. - Configuring the WAN port. We have a fiber connection from our ISP, the modem they provide has one useful interface port we can use for our internet connection. Basically just connect our router to their router with a network cable (UTP RJ-45).

Solved: Configuring Cisco 881 - Cisco Community

I just purchased cisco 881 router which I will connect to my DSL modem. Currently, I have configured it to use public IP with default vlan1 for all 4 LAN ports. I would like to configure the 2 ports to be used for public IP (123.123.123.160-175) with vlan (External network) and the other 2 ports for internal IP (192.168.XXX.XXX) with vlan as well.
