In this fourth edition of his ground-breaking work, Herbert A. Simon applies his pioneering theory of human choice and administrative decision-making to concrete organizational problems. To commemorate the fiftieth anniversary of the book's original publication, Professor Simon enhances his timeless observations on the human decision-making process with commentaries examining new facets of organizational behavior. Investigating the impact of changing social values and modern technology on the operation of organizations, the new ideas featured in this revised edition update a book that has become a worldwide classic. Named by Public Administration Review as "Book of the Half Century," Administrative Behavior is considered one of the most influential books on social science thinking, and was referred to by the Nobel Committee as "epoch-making." Written for managers and other professionals who wish to understand the decision-making processes at the heart of organization and management, it is also essential reading for students in business and management, economics, sociology, psychology computer science, government, and law.

Parasomnias can be roughly divided in Non-REM disorders and REM disorders, and this issue covers much of what is known today on the diagnosis and treatment of various types of parasomnias. Articles examine disorders such as sleepwalking, sleep sex, sleep violence, sleep eating, and diagnostic methods of these. The issue also delves into Forensic concerns, especially with regard to sleep violence. Other types of parasomnias discussed include sleep talking and sleep enuresis.

Schools can play an important role in addressing the unmet mental health needs of youth by potentially increasing access to care in a cost-effective manner. This venue provides unparalleled access to youth and exemplifies a single setting through which the majority of children can be reached. This very timely issue provides a much-needed analysis of the types of situations in which schools can and must address the mental health needs of their students, and the methodology for doing so. With an eye towards current technologies (articles cover telepsychiatry and web-based interventions), authors review school-based interventions for students suffering from post-traumatic stress-syndrome, generalized anxiety, social anxiety, depression, ADHD, psychoses, substance abuse, and other disorders. Of special interest are the articles covering bullying (including internet bullying) and mobilizing a crisis team after student death.
