continuing education. This CD-ROM offers student exams, homework assignments and PACE answer sheets.

Providing faculty and graduate students of nursing with a unique approach to analyzing the purpose and use of the clinical laboratory in nursing education, this second edition incorporates the advances made since publication of the successful first edition. New features include additional chapters on the use of clinical preceptors, the role of the college laboratory, including simulation as a teaching strategy, consideration of all persons involved in clinical teaching, and evaluation methods in clinical practice consistent with teaching strategies proposed.

Read Book Clinical Laboratory Education

For exam prep courses in clinical lab science and medical technology. A complete study guide for national certification and state licensure exams **SUCCESS!** in Clinical Laboratory Science is an all-in-one summary and review of major clinical laboratory science content areas. Known for its concise summaries and rationales, this long-trusted guide prepares students for national certification, state licensure, and undergraduate exams. With more than 2,000 practice questions, the 5th edition has significant new coverage spanning medical fields, plus revised questions and rationales reflecting the most current clinical laboratory practices, technology, and terminology.

Read Book Clinical Laboratory Education

This text presents guidelines for the design of a short course aimed at teaching final-year medical students how to use laboratory tests effectively. It responds to the need for physicians to understand the role of laboratory tests and the factors that influence the reliability of their results.

Hospitals are experiencing a labor shortage of qualified laboratory professionals. Multiple problems have contributed to this issue including a reduction in the number of clinical laboratory science programs nationwide. One way to address the shortage is by increasing the number of distance programs within the clinical laboratory sciences. The purpose of this study was to examine motivating and inhibiting factors

Read Book Clinical Laboratory Education

impacting clinical laboratory science program directors' decision to use distance education. Of 467 clinical laboratory science program directors listed on a national registry, 163 responded to an online survey utilizing a four-point Likert scale. Results indicated directors are motivated by intrinsic factors centered around the concept of flexibility. Directors with distance education experience were intrinsically motivated by students-centered factors, while directors without experience were intrinsically motivated by personal-centered factors. Several significant differences existed between group comparisons of inhibitors for directors with and without experience and when divided into programmatic setting creating three groups: medical laboratory science program directors in university settings, medical laboratory

Read Book Clinical Laboratory Education

technician program directors in technical college settings, and hospital-based program directors. Directors without experience and those hospital-based found more factors to be inhibiting.

For courses in clinical chemistry as part of clinical laboratory technician/medical laboratory technician (CLT/MLT) and clinical laboratory science/medical technology (CLS/MT) education programs. This ISBN is for the Pearson eText access card. A highly readable introduction to essential analytes, for CLT/MLT and CLS/MT students Clinical Laboratory Chemistry , 3rd Edition, is part of Pearson's clinical laboratory science series, which offers a balanced, engaging presentation of theory and application. The text

Read Book Clinical Laboratory Education

focuses on clinically significant analyses students are likely to encounter in the lab. Detailed technical information combined with real case studies helps students synthesize and analyze information and appreciate the significant role laboratory chemists play in patient care. Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience that can be adopted on its own as the main course material. It lets students highlight and take notes all in one place, even when offline. Educators can easily customize the table of contents, schedule readings, and share their own notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning. And, reading analytics offer insight into how students use the eText, helping educators
