Included is a foreword by Robert McCarter, architect, author and professor of architecture.

This book is open access under a CC BY license. The volume constitutes the proceedings of the 18th International Conference on Agile Software Development, XP 2017, held in Cologne, Germany, in May 2017. The 14 full and 6 short papers presented in this volume were carefully reviewed and selected from 46 submissions. They were organized in topical sections named: improving agile processes; agile in organization; and safety critical software. In addition, the volume contains 3 doctoral symposium papers (from 4 papers submitted).

When Drawing on the Right Side of the Brain was first published in 1979, it hit the New York Times bestseller list within two weeks and stayed there for more than a year. In 1989, when Dr. Betty Edwards revised the book, it went straight to the Times list again. Now Dr. Edwards celebrates the twentieth anniversary of her classic book with a second revised edition. Over the last decade, Dr. Edwards has refined her material through teaching hundreds of workshops and seminars. Truly The New Drawing on the Right Side of the Brain, this edition includes: the very latest developments in brain research new material on using drawing techniques in the corporate world and in education instruction on self-expression through drawing an updated section on using color detailed information on using the five basic skills of drawing for problem solving Translated into thirteen languages, Drawing on the Right Side of the Brain is the world’s most widely used drawing-instruction guide. People from just about every walk of life—artists, students, corporate executives, architects, real estate agents, designers, engineers—have applied its revolutionary approach to problem solving. The Los Angeles Times said it best: Drawing on the Right Side of the Brain is “not only a book about drawing, it is a book about living. This brilliant approach to the teaching of drawing . . . should not be dismissed as a mere text. It emancipates.”

With the advance of evidence-based practice has come the publication of numerous dense volumes reviewing the theoretical and empirical components of child and adolescent treatment. There are also a variety of detailed treatment manuals that describe the step-by-step procedures to guide ongoing research and practice. The second edition of Craig Winston LeCroy’s Handbook of Evidence-Based Child and Adolescent Treatment Manuals is a forceful combination of the two approaches, as he gathers fifteen varied treatment manuals and brief summaries of the research supporting each to ensure that practitioners will truly understand how to implement the treatments they are using. A completely revised and expanded edition of the handbook’s first edition, this is an essential guide to some of the best programs for helping children and teens. Each chapter begins with an explanatory section that discusses the theoretical and empirical underpinnings of the programs. The treatment manual follows, leading readers through sessions with specific details about conducting the treatment that have been refined and improved through extensive testing and research. Organized into three sections: the major clinical disorders, social problems confronting children and teens, and preventive interventions the Handbook brings together some of the most esteemed researcher-practitioners in the child and adolescent field. The book presents an impressive variety of innovative treatment programs and techniques including: the SiHLE program (intended to prevent problems confronting children and teens, and preventive interventions the Handbook brings together some of the most esteemed researcher-practitioners in the child and adolescent field. The book presents an impressive variety of innovative treatment programs and techniques including: the SiHLE program (intended to prevent HIV through education and self-esteem building), the Children of Divorce Intervention Program (a therapy for younger children stressing resilience and skill-building), and Strengths Oriented Family Therapy (which reaches out to substance-involved adolescents and their families). The Handbook of Evidence-Based Child and Adolescent Treatment Manuals is an indispensable reference for researchers, graduate students, and practitioners working with children and adolescents in a multitude of settings, from schools and juvenile correction centers to group homes and family service agencies.

Communication Skills for the Environmental technician This book provides environmental technology students with an enjoyable way to quickly master the basic communication skills needed by the environmental technician. Like all the books in the critically acclaimed Preserving the Legacy series, it follows a rapid-learning modular format featuring learning objectives, summaries, chapter-end reviews, practice questions, and skill-building activities. The only book available that specifically addresses the communication responsibilities of the environmental technician, it offers a thorough review of corporate communication basics and covers the environmental documents commonly generated by technicians. Communication Skills for the Environmental Technician features: * Advice on foundation reading and technical writing skills, including mastery of outlining and grammar awareness * Chapters on writing skills for business letters and memos; technical documents such as contingency plans, logbooks, and field notes; and completion and filing procedures for numerous reporting forms * In-depth coverage of oral communication skills, both for formal presentations and informal conferencing * Specifics of the job search: creating portfolios, writing resumes and cover letters, and performing well in the interview setting With its comprehensive coverage and quick-reference format, Communication Skills for the Environmental Technician is also a handy resource for any environmental technician needing a helpful refresher or useful working reference. The HAZARDOUS MATERIALS TRAINING AND RESEARCH INSTITUTE (HMTRI), recognized by agencies including the EPA, the National Science Foundation, and the National Institute of Environmental Health Sciences, was established in 1987 in Cedar Rapids, Iowa, with the intention of promoting worker protection and the maintenance of a clean and safe environment through education and training.
