Value creation is any process that creates outputs that are more valuable than its inputs. This is the basis of efficiency and productivity. The following are illustrative examples of value creation.

[8 Examples of Value Creation - Simplifiable](#)

The stakeholder approach aims to create a new narrative about business — a new story — that enables great companies to make our communities and our lives better through the creation of stakeholder value, rather than simply profit to shareholders. The story includes a recognition that if we want the outcome of business to be a more responsible capitalism, it requires stakeholders to value ...

The value that's created and captured by a company is the profit margin: Value Created and Captured – Cost of Creating that Value = Margin. The more value an organization creates, the more profitable it is likely to be. And when you provide more value to your customers, you build competitive advantage.

Value Chain Definition - investopedia.com

A company's operations are the activities that produce and deliver a product or service. Operations management is the profession that encompasses planning, implementing, and supervising that production. Some people think of operations as the daily tasks and tactics that transform materials or actions into a product or service, but operations strategy goes a level higher to determine operations approaches and goals.
