Changes of behaviour in the later stages | Alzheimer's Society

Changes in behaviour can be one of the most difficult aspects of living with dementia, both for the person with the condition and those around them. These behaviours usually happen when the person is feeling confused or distressed and trying to make sense of what is happening, or when they are trying to communicate that they need something. Looking at the causes of the behaviour and identifying the person ' s needs can help to reduce them or make them easier to manage.

Changes in behaviour | Alzheimer's Society

In the middle to later stages of most types of dementia, a person may start to behave differently. This can be distressing for both the person with dementia and those who care for them. Some common changes in behaviour include: repeating the same question or activity over and over again ; restlessness – pacing up and down, wandering, fidgeting
