Designing and Conducting Health Surveys is written for students, teachers, researchers, and anyone who conducts health surveys. This third edition of the standard reference in the field draws heavily on the most recent methodological research on survey design and the rich storehouse of insights and implications provided by cognitive research on question and questionnaire design in particular. This important resource presents a total survey error framework that is a useful compass for charting the dangerous waters between systematic and random errors that inevitably accompany the survey design enterprise. In addition, three new studies based on national, international, and state and local surveys—the UNICEF Multiple Indicator Cluster Surveys, California Health Interview Survey, and National Dental Malpractice Survey—are detailed that illustrate the range of design alternatives available at each stage of developing a survey and provide a sound basis for choosing among them.

Dental Management of Sleep Disorders focuses on the dentist's role in treating patients with sleep problems, chiefly sleep disordered breathing and bruxism. A practical clinical book, Dental Management of Sleep Disorders highlights the background to these problems, discusses the dentist's role in their diagnosis and treatment, and outlines clinical strategies and guidance. The book features a full discussion of the use of appliances, an overview of current treatment modalities, and investigates the
