The most widely used tool for screening proper development in a child for a long time was the Denver Developmental Screening Test (Denver scale), which suggests milestones according to the age. Even today the tool is used in many countries. However, it is a rather old tool and it is important to remember that these are just screening tests.

Montessori School in Mayfair: The Model for Early Education

The Denver Developmental Screening Test was introduced in 1967 to identify young children, up to age six, with developmental problems. A revised version, Denver II, was released in 1992 to provide needed improvements. The purpose of the tests is to identify young children with developmental problems so that they can be referred for help.
