This pocket guide provides a comprehensive start-to-finish overview of the basics of scale development, giving practical guidance that practitioners at all levels will be able to put to use.

Wetland and Stream Rapid Assessments: Development, Validation, and Application describes the scientific and environmental policy background for rapid wetland and stream assessments, how such assessment methods are developed and statistically verified, and how they can be used in environmental decision-making—including wetland and stream permitting. In addition, it provides several case studies of method development and use in various parts of the world. Readers will find guidance on developing and testing such methods, along with examples of how these methods have been used in various programs across North America. Rapid wetland and stream functional assessments are becoming frequently used methods in federal, state and local environmental permitting programs in North America. Many governments are interested in developing new methods or improving existing methods for their own jurisdictions. This book provides an ideal guide to these

initiatives. Offers guidance for the use and evaluation of rapid assessments to developers and users of these methods, as well as students of wetland and stream quality Contains contributions from sources who are successful in academia, industry and government, bringing credibility and relevance to the content Includes a statistically-based approach to testing the validity of the rapid method, which is very important to the usefulness and defensibility of assessment methods

The Social Worker's Desk Reference fourth edition remains the definitive resource for social work students and professionals. Expanded sections on current hot topics such as white nationalism, gaming disorder, substance abuse, LGBTQ+ populations, suicide, sexual violence in the military, and vulnerable populations make the fourth edition a fully updated and essential reference.

Clinical Assessment for Social Workers provides a wide range of standardized assessment tools, derived from different perspectives, to give readers greater flexibility in information gathering and intervention planning. Incorporating both quantitative and qualitative methods, the authors encourage readers to approach assessment as both an art and a science. They advocate for discovering the balance between scientific, evidence-based approaches and the development of personal practice wisdom.

This practice-oriented text presents evidence-based assessment methods and interventions that have been extensively field-tested in child welfare settings. The contributors offer empirical and field insights, comprehensive treatment models, and curricula in key areas such as child maltreatment, substance abuse, parent

training, social skills, and youth employment interventions. For the professional reader, the book offers real-world guidance on social work practice, from hiring opportunities within a system to promoting lasting change as families and their issues grow increasingly complex. These chapters also take significant steps toward future improvements in child protection systems as the field evolves toward being more coordinated, effective, and professional. Included in the coverage: Legal requisites for social work practice in child abuse and neglect. The integrated model for human service delivery in child welfare. Risk assessment: issues and implementation in child protective services. Substance use and abuse: screening tools and assessment instruments. The process of intervention with multi-problem families. Preventative services for children and adolescents. Its multi-level approach makes Evidence-Informed Assessment and Practice in Child Welfare an essential professional development text for social workers, particularly those new to the job, as well as a progressive blueprint for social work administrators.

Praised by instructors and students alike, PROGRAM EVALUATION, 6th Edition helps your students evaluate services and programs that they will encounter in their professional practice. In the process of learning evaluation techniques and skills, students will become proficient at critically analyzing evaluation studies conducted by others. The authors present and simplify all the essentials needed for a critical appreciation of evaluation issues and methodology. The text's clear writing style and clear presentation of concepts, as well as its hands-on and applied focus, guide students on how to gather evidence and demonstrate that their interventions and programs are effective in improving clients' lives. This edition's up-to-date

coverage includes a greater number of references to current literature, emphasizing that consulting the literature is an important step in recognizing, developing, and evaluating evidence-based practice or research-informed practice. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A lifespan approach presenting evidence-informedinterventions for working with individuals and families Social Work Practice with Individuals and Families coversassessment of and intervention with children, adolescents, adults,the elderly, and families. It offers an array of pedagogicalfeatures within each chapter, as well as online resources andreview questions at the conclusion of each chapter to help guidecritical thinking about topics. Reflecting the current state of evidence-informed social workpractice, each chapter's contributors emphasize the incorporationof wider forms of systematically collected data such as casestudies, best or promising practices, and consumer-focused data.Reading this book will not only give readers the tools to workeffectively with individuals and families, but also develop theirskills in evidence informed practice. Comprehensive and insightful, Social Work Practice withIndividuals and Families is a student- andpractitioner-friendly text identifying the best assessment toolsand strategies available for social workers to successfully serveindividuals and families facing a broad range of challenges.

This book offers a single publication to be utilised comprehensively as a reference manual within current mammographic clinical practice for use by assistant practitioners and practitioners as well as trainees in

radiography and related disciplines. In recent years mammographic clinical practice and technology have evolved rapidly and become increasingly sophisticated, this book will cover these issues. The public feel increasingly empowered to 'have a say' in their care and expectations of their mammography experience is high. Consequently a well-trained, well-informed practitioner is of paramount importance in clinical practice today. This book addresses patient/client-related issues in the form of psychological and emotional support they may require. This will enable the reader to gain insight into the patient/client perspective and thereby assist in meeting their needs.

Educational psychology is a broad field characterized by the study of individuals in educational settings and how they develop and learn. It incorporates information from such sub-disciplines such as developmental psychology, human development across the life span, curriculum and instruction, motivation, and measurement and assessment. Neil Salkind has mined the rich and extensive backlist of SAGE education and psychology journals to pull together a collection of almost 100 articles to be the definitive research resource on education psychology. Section One: Human Growth and Development focuses on the processes involved in human growth and development including ages and stages of development, different theoretical perspectives and the role and effectiveness of early intervention among other topics. Section Two: Cognition, Learning and Instruction concentrates on the mechanisms, through which individuals learn and retain information. Section Three: Motivation explores why individuals seek out goals and what the mechanisms are that characterize this search as it relates to learning. Section Four: Measurement, Assessment and Statistics looks at the topics that are critical to

understanding individual differences, the growth in the use of computers as assessment tools, qualitative and quantitative methods, statistical techniques and evaluation.
