Develop your critical thinking and clinical reasoning skills with 150 realistic case studies from the four major clinical practice areas: medical-surgical, pediatric, maternity, and psychiatric/mental health nursing. Each case covers a common problem, drawn from actual clinical experiences and written by nurses who are clinical experts. All cases have been thoroughly updated and revised to reflect current clinical practices, with integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of care. This fifth edition also features an increased emphasis on patient management, and new documentation and communication exercises. Plus new NCLEX® Examination format-questions help you prepare for success on the NCLEX® Examination and provide safe, quality patient care. Three-part organization presents cases in three parts: 1) Medical-Surgical Cases; 2) Pediatric, Maternity, and Psychiatric Cases; and 3) Other/Advanced Cases, the latter covering key topics such as multi-system disorders and emergency situations. Realistic case study approach incorporates cases drawn from actual clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Increasing case complexity provides you with a foundation on which to build as you advance to more difficult cases. Two new pediatric case studies strengthen your ability to recognize and effectively manage common disorders presenting in pediatric patients. New NCLEX Examination-format questions have been added throughout, including multiple choice, prioritization/ordering, chart/exhibit, and dosage calculation questions. Increased number of higher-level questions requires clinical reasoning rather than simply memorizing and recalling information. An emphasis on patient management reinforces the type of clinical decision-making needed in the clinical setting as well as reflecting the type of questions on the latest NCLEX Examination. Over 25 new illustrations and graphics such as ECG strips, lab/diagnostic test reports, anatomical diagrams, and medication labels are now interwoven throughout the book. New documentation and communication exercises ask you to document relevant patient information or to use the "SBAR" communication technique to communicate patient findings to the physician.

"Features 150 case studies that cover all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. This edition reflects the most current standards of clinical practice, including content on pharmacology, nutrition, and diagnostic/laboratory tests to prepare you for all aspects of patient care."--Publisher

A collection of case studies for nursing students and practitioners offers 148 examples that foster creative thinking skills in medical-surgical, pediatric, maternity and psychiatric situations.

Reflecting the latest practices in the field, *Clinical Decision Making: Case Studies in Medical-Surgical Nursing*, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Tap into 150 unique case studies covering all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing, all newly organized to facilitate a conceptual approach to teaching and learning. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. Cases include integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of patient care. The 7th edition features a new concept-based organization, an enhanced focus on interprofessional collaboration and QSEN, 20 all-new case studies, and updated content throughout to reflect the most current standards of clinical practice.

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.
