accessible style by leading scholars in the field, the chapters survey key issues and themes vital to any understanding of the Kurds and Kurdistan including Kurdish language; Kurdish art, culture and literature; Kurdistan in the age of empires; political, social and religious movements in Kurdistan; and domestic political developments in the twentieth and twenty-first centuries. Other chapters on gender, diaspora, political economy, tribes, cinema and folklore offer fresh perspectives on the Kurds and Kurdistan as well as neatly meeting an exigent need in Middle Eastern studies. Situating contemporary developments taking place in Kurdish-majority regions within broader histories of

changing economies and technologies. The authors of this book consist of leading researchers, academics and experts from Charles Darwin University, The Australian National University, James Cook University, the Australian Institute of Marine Science and many other collaborative partners. Many of the authors have first-hand experience of living and working in Northern Australia. They understand the real issues and challenges faced by people living in Northern Australia and other similar regional areas. Backed by their expertise and experience, the authors present their discussions and findings from a local perspective.

This book constitutes the thoroughly refereed post-workshop proceedings of the International Workshop on Algorithmic Engineering and Experimentation, ALENEX'99, held in Baltimore, Maryland, USA, in January 1999. The 20 revised full papers presented were carefully selected from a total of 42 submissions during two rounds of reviewing and improvement. The papers are organized in sections on combinatorial algorithms, computational geometry, software and applications, algorithms for NP-hard problems, and data structures.

the core of every human's quest for freedom, love, and happiness. In this groundbreaking book, spiritual counselors Luna and Sol detail the many stages, paths, and pitfalls connected with this sacred evolutionary process. By reconnecting with your Soul, you will discover how to experience the joy, liberation, and peace that you have been searching for all along. In these pages, you will discover:

1. What is happening to you
2. Why you're experiencing a spiritual awakening
3. The many spiritual awakening symptoms and stages
4. The three inner worlds of the spiritual journey
5. What to do when your awakening becomes a spiritual emergency
6. Signs you're experiencing Soul loss
7. How to retrieve and

integrate any fragmented pieces of your psyche through self-love, inner child work, and shadow work 8. What spiritual “traps” you need to be mindful of 9. How to communicate with your Soul Through the inner work practices of Inner Child Work, Self-Love, and Shadow Work, this book gives you the tools to initiate your own deep psychological healing. By removing the blocks and walls that surround your Soul, you will be able to access deep levels of joy, creativity, energy, courage, peace, fulfillment, freedom, and love. The Spiritual Awakening Process is a psychospiritual manual that is composed of various articles that we have published on lonerwolf.com in the past. We have also added extra

This book is about synergy in computational intelligence (CI). It is a collection of chapters that covers a rich and diverse variety of computer-based techniques, all involving some aspect of computational intelligence, but each one taking a somewhat pragmatic view. Many complex problems in the real world require the application of some form of what we loosely call "intelligence" for their solution. Few can be solved by the naive application of a single technique, however good it is. Authors in this collection

recognize the limitations of individual paradigms, and propose some practical and novel ways in which different CI techniques can be combined with each other, or with more traditional computational techniques, to produce powerful problem-solving environments which exhibit synergy, i. e. , systems in which the whole is greater than the sum of the parts .

Computational intelligence is a relatively new term, and there is some disagreement as to its precise definition. Some practitioners limit its scope to schemes involving evolutionary algorithms, neural networks, fuzzy logic, or hybrids of these. For others, the definition is a little more flexible, and will include

paradigms such as Bayesian belief networks, multi-agent systems, case-based reasoning and so on. Generally, the term has a similar meaning to the well-known phrase "Artificial Intelligence" (AI), although CI is perceived more as a "bottom up" approach from which intelligent behaviour can emerge, whereas AI tends to be studied from the "top down", and derive from pondering upon the "meaning of intelligence". (These and other key issues will be discussed in more detail in Chapter 1.
