For the first time, Stephen Grey tells the inside story of international prisons sanctioned by the U.S. Government and used by the CIA to hold and torture people suspected of terrorism. Using contacts deep inside the U.S. Government, Grey reveals how deeply the Bush administration is involved in the program and questions the truth of statements made by Secretary of State Condoleeza Rice. He also shines a spotlight on the heads of European nations who turned a blind eye to the program when it showed up in their back yards. Grey takes an unflinching look at a horrendous practice that scorns Geneva Convention rules and is powered by corruption at the highest levels of governments worldwide. Through his unprecedented access to CIA flight records and dozens of sources at the senior levels of the current administration, Grey has produced a story of flight plans, extreme torture, and the clash of religions and governmental posturing that goes on today. Ghost Plane tells the stories of individuals abducted at airports around the world and transported for interrogation and torture on a fleet of leased planes manned by CIA operatives. Grey paints a disturbing ethical picture of the war on terror and lays the responsibility for abduction and torture at the doorstep of Washington, D.C.

There are events witnessed in that half-way region between heaven and earth that defy all rational explanation. For years, author and pilot Martin Caidin collected these strange but true stories of aerial hauntings from experienced pilots and astronauts. His startling conclusion: Something is out there!

The cloud cover had finally begun to clear after 8 days and nights. It was time for action. Both the Allies and the German forces had prepared for what was coming. It was likely to be the turning point of the air battle over Europe. Like most other airmen on both sides of the war, we knew how important our mission was this day. It could very well be the beginning of the end for the Nazi air forces, or it could set back our surge into Germany many months. Such was the mindset of most every member of the air group as we set our sights on the beginning of the most ambitious air assault ever. We were all nervous and afraid yet anxious to take off and do what we had trained for so long. Our ship was brand new and had been tested over and over for any possibility of malfunction. We were ready and so was our ship. Then, the unthinkable happened... The events which followed, set the stage for one of the most

mysterious happenings of that day. It was to haunt everyone in the crew for the rest of their lives and change the course of history for all on board.

On Christmas Eve 1971, the packed LANSA flight 508 from Lima to Pucallpa was struck by lightning and went down in dense jungle hundreds of miles from civilization. Of its 93 passengers, only one survived. Juliane Koepcke, the seventeen-year-old child of famous German zoologists. She'd been thrown from the plane two miles above the forest canopy, but had sustained only a broken collarbone and a cut on her leg. With incredible courage, instinct and ingenuity, she survived three weeks in the "green hell" of the Amazon - using the skills she'd learned in assisting her parents on their research trips into the jungle - before coming across a loggers hut, and, with it, safety. Now she tells her fascinating story for the first time, and in doing so tells us about her 'Gerald Durrell' childhood - with a menagerie of wild, exotic and sometimes dangerous pets - about how she learned to survive at her parents ecological station deep in the rainforest and about her present-day commitment to this wildlife as a biologist and dedicated environmentalist.

Describes the mysterious happenings surrounding the crash of Eastern Airlines Flight 401, which happened in 1972.

After their mother dies in a plane crash, ten-year-old Christina and her twin brother move with their father to a seemingly haunted house in a strange neighborhood.

Meet Blackwater USA, the private army that the US government has quietly hired to operate in international war zones and on American soil. Its contacts run from military and intelligence agencies to the upper echelons of the White House; it has a military base, a fleet of aircraft and 20,000 troops, but since September 2007 the firm has been hit by a series of scandals that, far from damaging the company, have led to an unprecedented period of expansion. This revised and updated edition includes Scahill's continued investigative work into one of the outrages of our time: the privatisation of war.

"The Ghosts of Langley offers a detail-rich, often relentless litany of CIA scandals and mini-scandals. . . [and a] prayer that the CIA learn from and publicly admit its mistakes, rather than perpetuate them in an atmosphere of denial and impunity." —The Washington Post From the writer Kai Bird calls a "wonderfully accessible historian," the first major history of the CIA in a decade, published to tie in with the seventieth anniversary of the agency's founding During his first visit to Langley, the CIA's Virginia headquarters, President Donald Trump told those gathered, "I am so behind you . . . there's nobody I respect more," hinting that he was going to put more CIA operations officers into the field so the CIA could smite its enemies ever more forcefully. But while Trump was making these promises, behind the scenes the CIA was still reeling from blowback from the very tactics that Trump touted—including secret overseas prisons and torture—that it had resorted to a decade earlier during President George W. Bush's war on terror. Under the latest regime it seemed that the CIA was doomed to repeat its past failures rather than put its house in order. The Ghosts of Langley is a provocative and panoramic new history of the Central Intelligence Agency that relates the agency's current predicament to its founding and earlier years, telling the story of the agency through the eyes of key figures in CIA history, including some of its most troubling covert actions around the world. It reveals how the agency, over seven decades, has resisted government accountability, going rogue in a series of highly questionable ventures that reach their apotheosis with the secret overseas prisons and torture programs of the war on terror. Drawing on mountains of newly declassified documents, the celebrated historian of national intelligence John Prados throws fresh light on classic agency operations from Poland to Hungary, from Indonesia to Iran-Contra, and from the Bay of Pigs to Guantánamo Bay. The halls of

Langley, Prados persuasively argues, echo with the footsteps of past spymasters, to the extent that it resembles a haunted house. Indeed, every day that the militarization of the CIA increases, the agency drifts further away from classic arts of espionage and intelligence analysis—and its original mission, while pushing dangerously beyond accountability. The Ghosts of Langley will be essential reading for anyone who cares about the next phase of American history—and the CIA's evolution—as its past informs its future and a president of impulsive character prods the agency toward new scandals and failures.
