## School Specialty

The largest or the heaviest objects have the strongest pull. “ Larger or heavier the object stronger the pull (gravity). Smaller or lighter the object weaker the pull (gravity). ” . This means a heavy object is being pulled strongly towards the centre of the Earth. A light object is not being pulled so strongly.

Is gravity really a force?

Is gravity really a force? | Yahoo Answers  
What is gravity? Gravity is one of four physical forces in nature that shape the universe. These forces include strong nuclear forces, weak nuclear forces and electromagnetic forces. The force of gravity has an infinite range. It is the pull of two bodies of matter that brings them closer together.

Grades 6, 7 and 8 | Science | Middle School | Gravity

That invisible force that makes you land or pulls you back to Earth is called gravity. All planets have this force that pulls them back to the center of it. Anything that has mass also has a gravity. The larger the object the greater gravity that is exerted by it.
