Even today few Americans understand the strategy, doctrine, and tactics of communist guerrilla warfare. Back in the early 1950s, the Rand Corporation conducted com - puter - simulated war games focused on Southeast Asia. The French agony in Indochina had attracted the attention of a few Rand researchers who had begun to wonder whether other wars might occur in this area and how the United States might fight if it became involved. The Rand scenarios ranged from atomic war to guerrilla conflict. WhUe a professor at the California Institute of Technology, I was asked to comment on some of these games. One thing struck me almost immediately-the communist enemy, or red forces, behaved and fought exactly like the Americans, or blue forces. From my limited knowledge of the French Indochina war, I did not think this was the case. The director of the war games, the late Dr. Edwin Paxson, agreed with my comment, but plaintively asked, "How do they behave and fight?" I offered to write a handbook for the red side, based on the Viet Minh operations against the French in Indochina. After research in Paris with the French army and air force, I duly completed my handbook in 1958, but by then it was of interest to no one. However, when John F. Kennedy became president, he stirred up great interest in Indochina and guerrilla warfare. My red team handbook, gathering dust, was quickly revised and declassified. It was published in 1961 as the first edition of this book.

The first documented, systematic study of a truly revolutionary subject, this 1937 text remains the definitive guide to guerrilla warfare. It concisely explains unorthodox strategies that transform disadvantages into benefits.
