Nei Gong has been a well-kept secret within the Daoist sects of China for centuries. Based upon the original teachings of the great sage Laozi, it has only ever been taught to close students of the masters chosen as the heads of the ancient orders. This book provides a breakdown of the entire Nei Gong process, and explains in plain English the philosophy which underpins Nei Gong practice, and which is based on the

original teachings of the ancient Daoist priests. The methodology of Sung breathing, an advanced meditative practice which has until now been reserved for 'inner-door' students is described, and the book contains an entire set of Qigong exercises accompanied by instructional photographs and drawings. This book will be of interest to all practitioners of Qi Gong, martial arts and meditation, and will be a rewarding read for anyone interested in Eastern philosophy.

Within the context of a larger discussion of Dao Yin, Damo Mitchell teaches and explains the Dragon Dao Yin exercises, a set of four short sequences designed to work with the subtle energies of the spine and lead pathogenic energies out of the body. More 'Yang' in nature than Qi Gong, Dao Yin focuses on outwards movements and strong internal cleansing. The book highlights this important distinction and covers the theory, history and development of Dao Yin exercises, as well as the relationship between Chinese medical theory and Dao Yin training. One chapter is devoted to problems related to stagnation and the flow of Qi, and explains the different causes and forms of stagnation. Later chapters look at breathing patterns and the extension of Yi, opening the joints, and rotating the bones and spine. Damo Mitchell also discusses stillness as the source of movement, the philosophical significance of the Dragon and the pearl, and the means of

hardwiring Dao Yin exercises into the energetic body. Central to the discussion is the concept of the spine, and how to wake it up. For the first time in the English language, the Dragon exercises - Awakening, Swimming, Soaring and Drunken - are described in detail, with photographs and step-by-step instructions on each of the exercises as individual therapeutic exercises and as a form.

The concept of self-care is, in fact, thousands of years old. This buzzword is rooted in a 2,500-year old Chinese philosophy. 'Yang sheng' means to nourish life - fostering your own health and wellbeing by nurturing body, mind and spirit. In this book, Katie Brindle teaches readers how to harness this powerful natural healing system to improve every aspect of their life. Yang Sheng fits and works brilliantly in modern life. Some of the techniques may seem unusual, but they are all simple, quick and effective. Even more appealing, a key principle of Chinese medicine is balance; that means not being perfect or excluding foods or having too many rules or pushing yourself to exhaustion with overwork or over-exercise. And so, Yang Sheng encourages you to have the green juice and the glass of

wine, a full-on day at work and a night out dancing. For people who are overtired and overtaxed, stressed, lacking a sex drive, or who feel anxious or hopeless, the practice of Yang sheng restores balance. Our bodies are designed to self-heal - Yang Sheng knows the mechanics of how to activate this.

Explaining the process and energetics of Daoist internal alchemy, the author describes in detail the practice of Nei Dan, the alchemical firing practice of Daoism that has until very recently been a closely guarded secret. Drawing together a huge amount of esoteric material on the hidden aspects of Daoist practice, he presents theory and practice coherently for Western practitioners. He offers his own experiences of each stage of attainment, describing the tangible results that should appear, and provides guidance on the practicalities and potential pitfalls of alchemical training.

Although the energetic anatomy of men and women is different, the ancient teachings of Nu Dan, a separate branch of internal alchemy for women, have been lost in the literature over the centuries and only survive through practice in the lineages. This book takes a detailed look at female energetic anatomy, exploring how it is different from its male counterpart, and explains and describes the specific practices which support the unique strengths and challenges that the female energy system presents. Previously wrapped in secrecy, the teachings in this book include qigong exercises that activate the energy of the uterus and an explanation of how menstruation and a connection to the cycles of the moon can be converted into a tool for
