After the events of Hellhole Awakening, the people of Hellhole and the shadow-Xayans scramble to rally against the threat from the still-living rogue Xayans. Back on Sonjeera, the Monarchy is in an uproar after their surprising defeat and the breakaway of the Deep Zone planets. The dowager Queen decides to go to Hellhole on a diplomatic mission, hoping to keep her power. But after touring Hellhole, Queen Michella is shaken, and begins to realize that she can never have the old Monarchy back. Before the Queen can return to Sonjeera, she's captured by the rogue Xayans and learns the reason for their attack: the orthodox Xayans had developed their minds to the point where they could evolve and, in so doing, trigger another Big Bang, wiping out everything. The rogue Xayans thought they succeeded in stopping the ascension, but the orthodox Xayans on Hellhole are nearly ready. Now, twenty-two huge asteroids from the outer reaches of the solar system are bearing towards Hellhole, summoned by the rogue sect as a last resort. Can all these lives and the planet itself be saved?

The planet HELLHOLE, devastated by an ancient asteroid impact, is inhabited by only the hardest and most desperate colonists. It is one of 54 remote frontier worlds forced to pay tribute to the corrupt Constellation, which is ruled by decadent nobles. An exiled rebel general, Tiber Adolphus, has now mounted a second rebellion against the Constellation, much larger than his earlier failed attempt. This time Adolphus aligns himself with the Xayans, a resurrected alien race from Hellhole. As the ancient civilization awakens, the Xayans encourage colonists to immerse themselves in strange "slickwater" pools and acquire ancient alien memories. Their goal is to gather sufficient numbers to achieve ala'ru, an accelerated evolution that will transform them into godlike beings. General Adolphus rallies his fellow rebels from across the vast Deep Zone to fight for their independence, while the ruthless leader of the Constellation, Diadem Michella, vows to eradicate the rebellion and all colonists on Hellhole. The Xayans add their "telemancy" defenses to the General's conventional military resources, until they reveal an enemy far more terrifying than the Army of the Constellation: a faction of rogue Xayans bent on the extermination of their race . . . and the destruction of any planet that happens to be in the way. As a barrage of deadly asteroids hurtles toward Hellhole, and the Constellation's gigantic space fleet arrives for a final engagement against General Adolphus, the hardy settlers are caught between a human enemy that wants to raze their colony to the ground and much more powerful aliens who can destroy not only themselves, but human civilization, as well as the foundations of the universe itself. Only the most desperate colonists dare to make a new home on Hellhole. Reeling from a recent asteroid impact, tortured with horrific storms, tornadoes, hurricanes, earthquakes, and churning volcanic eruptions, the planet is a dumping ground for undesirables, misfits, and charlatans...but also a haven for dreamers and independent pioneers. Against all odds, an exiled general named Adolphus has turned Hellhole into a place of real opportunity for the desperate colonists who dare to make the planet their home. While the colonists are hard at work developing the planet, General Adolphus secretly builds alliances with the leaders of the other Deep Zone worlds, forming a clandestine alliance against the tyrannical, fossilized government responsible for their exile. What no one knows is this: the planet Hellhole, though damaged and volatile, hides an amazing secret. Deep beneath its surface lies the remnants of an obliterated alien civilization and the buried memories of its unrecorded past that, when unearthed, could tear the galaxy apart.

In this exhilarating sequel to Brian Herbert and Kevin J. Anderson's Hellhole, the stakes on planet Hallholme have been raised to new heights. After declaring his independence from the corrupt Constellation, rebel General Adolphus knows the crackdown is coming. Now he needs to pull together the struggling Hellhole colony, the ever-expanding shadow-Xayan settlement, and his connections with the other Deep Zone worlds. Even then, he doubts his desperate measures will be enough. Diadem Michella Duchenet has collected a huge space fleet led by Commodore Escobar Hallholme, son of the hero who originally defeated Adolphus. They expect resistance from the General's rebels, but who could possibly stand up to such a mighty fleet? Adolphus knows he's running out of time, but he still has some hope—the shadow-Xayans have banded together to defend their sacred planet with "telemancy," but can they discover new powers to protect all the stored alien lives on the already devastated world? And when all hope seems lost, the awakened Xayans reveal information hidden even from their own followers—the existence of a bigger threat that makes even the Constellation fleet seem insignificant. Disaster has come for General Adolphus and Hellhole...and this time there is no escape. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The definitive graphic novel adaptation of *Dune*, the groundbreaking science-fiction classic by Frank Herbert. *Dune*, Frank Herbert's epic science-fiction masterpiece set in the far future amidst a sprawling feudal interstellar society, tells the story of Paul Atreides as he and his family accept control of the desert planet Arrakis. A stunning blend of adventure and mysticism, environmentalism, and politics, *Dune* is a powerful, fantastical tale that takes an unprecedented look into our universe, and is transformed by the graphic novel format. In the first volume of a three-book trilogy encompassing the original novel, Brian Herbert and Kevin J. Anderson's adaptation retains the story's integrity, and Raúl Allén and Patricia Martín's magnificent illustrations, along with cover art by Bill Sienkiewicz, bring the book to life for a new generation of readers.

After solving the environmental problems of the United States, dictator Chairman Rahma must fight off new weapons being deployed by the corporations and deal with unsettling reports of mutants in the new novel from the author of *Hellhole*. 25,000 first printing.

A futuristic mystery from the New York Times Bestselling author of over a dozen books in the *DUNE* series. In the summer of 2097, Riggio wakes up with amnesia--and his lover dead in their bed. A knife sticks out of the center of her chest, and her blood stains the sheets of the hotel bed. He doesn't know who did it or why; he has only some vague memories of the attack. He recalls her blood curdling screams, her final gasps, and the terror in her eyes. She had recognized the murderer, no doubt, the man in shadows who had stood over their bed. Riggio tries to place the man and the time of the murder, but the events in his memory are sketches at best. Driving an escape car he doesn't remember acquiring and running from a past he fears, Riggio only knows one thing for sure: Someone is chasing him, and they are getting closer.

Who needs Heaven? God, it turns out, lives on the planet Tananius-Ofo in the distant galaxy 722C12009. And now, after countless millennia, He's invited us to come visit Him. Not everybody, mind you. Just an odd assortment of heathens, heretics, pantheists, perverts, and true believers of every sect and creed--all crammed into a single white spaceship piloted by a slightly crazed biocomputer. Each pilgrim is determined to be the first to reach God and learn His secrets . . . If they don't all kill each other on the way there.

In an overpopulated world seeking living room in the jungles, the International Ecological Organization was systematically exterminating the voracious insects which made these areas uninhabitable. Using deadly foamal bombs and newly developed vibration weapons, men like Joao Martinho and his co-workers fought to clear the green hell of the Mato Grosso. But somehow those areas which had been completely cleared were becoming reinfested, despite the impenetrable vibration barriers. And tales came out of the jungles . . . of insects mutated to incredible sizes . . . of creatures who seemed to be men, but whose eyes gleamed with the chitinous sheen of insects. . . . A fascinating examination of the fragile balance between consciousness, man and insect from one of the best-loved science fiction creators of all time. On the peanut-shaped planetoid of Ut, a 150-million-year-old computer named Mamacita rules with dictatorial control. Her every whim is a steadfast rule, and no command is stronger than the ban of Sudanna, the wind that sweeps across Ut spreading the liberating sounds of music. Hiley OIV is one of Ut's most conscientious inhabitants, a man so afraid of losing his head (utpeople have very precarious necks) that a Bad Thought almost never enters his mind. But now his teenage daughter has fallen in love with Prussirian BBD--Ut's most notorious outlaw--a man who has broken Mamacita's cardinal rule: he makes music.
