Horse Care & Management | Advice & Information | The BHS Skills Library

Keeping horses and ponies healthy and happy. Owning and caring for a horse or pony is great fun and immensely rewarding. But it's also a big responsibility and a long-term commitment, in terms of care, hard work and finances. There's no one 'perfect' way to care for all horses and ponies because every animal and every situation is different.

Place the stethoscope just in front of the girth area, just behind the horse's elbow. Alternatively, press your fingers under the horse's cheekbone along the large artery that you will feel underneath the skin. Starting at zero, count the number of beats you hear or feel in 15 seconds and multiply that value by four.

Step 4 provides specialist treatments within NICE guidelines. In comparison to other steps, Step 4 treats a small minority of people. This is usually because the treatments in steps 2 and 3 haven't helped them enough, or because they are at risk of self-neglect or harm, functional impairment or are dealing with more complex conditions, which possibly include other social factors or chronic ...

grooming routine. The hooves should be "picked" daily to remove manure, dirt, and stones, and checked for signs of bruising, odor, discoloration, or discharge. The shoes should also be checked for wear and tightness of the nails (see Routine Health Care of Horses : Shoes). Hoof dressings may be needed, but care should be taken to apply them appropriately.
