About Incorporating
iCloud into Your App

Choose iCloud. Select your Team from the drop-down. At this point, Xcode might prompt you to enter the Apple ID associated with your

Where To Download

iOS developer account. If so, then type it in as requested. Next, enable CloudKit by checking the CloudKit checkbox in the Services group.

[CloudKit Tutorial:
Getting Started |
raywenderlich.com](#)

To enable iCloud and select CloudKit. In the

Where To Download

Capabilities pane, select the switch in the iCloud row. Xcode provisions your app to use iCloud. (Key-value storage is enabled by default.) Select the CloudKit checkbox. Xcode creates a default CloudKit container based on the bundle ID and adds the CloudKit framework to
