A book for the  
physical therapy  
student which will  
train students on how  
to achieve functional  
outcomes in patients  
through  
neurorehabilitation.  
Focuses on patients  
with significant  
impairments and  
functional limitations  
requiring active  
rehabilitation (for

# Download File PDF Improving

example, stroke, spinal cord injury, etc.) and on presenting information on skills necessary for the patient to function independently in daily life (i.e. transfer skills, wheelchair skills, balance skills). The text progresses from determining appropriate treatment
