Can Black English stand between black students and success in math and science? In this groundbreaking study, Eleanor Wilson Orr argues that the performance of black students in math and science is crippled not by lack of intelligence or diligence but by linguistic interference. Using student work from an experimental

program she helped establish in the District of Columbia, Orr traces specific ways that nonstandard English usage can lead to misunderstanding and misrepresentation in the classroom. This controversial book challenges classroom teachers, school administrators, and citizens in general to rethink their views on how to improve the performance of minority youth in American schools. In a new introduction for this 1997 edition, Orr takes on the latest widespread debate over "Ebonics" and the role Ebonics-based programs might play in

case study scenarios. The textbook pursues an integrative approach to modern microeconomics by critically reflecting on the main findings of economics from a philosophical standpoint and comparing them to approaches found in the social sciences. It adopts an institutional perspective to analyze the potential and limitations of different market types, and highlights implications for the design of the legal system and business practices throughout. In addition to traditional rational-choice models, important findings from behavioral economics and
