Jack Donnelly's *Universal Human Rights in Theory and Practice* (3rd Ed., 2013) is a fundamental text for those studying any area of human rights. Starting out by establishing a basic understanding of what "human rights" means, Donnelly leads up to his main premise that human rights are equal, inalienable, and universal, even with considerations of cross-cultural relativism.

Human rights are equal rights; all people have the same human rights as everyone else. They are inalienable; one cannot stop being human no matter how badly one behaves or how monstrously one is treated. And they are universal in that we consider all members of the species Homo Sapiens as human beings and thus, automatically, holders of human rights. Human rights can be violated, ignored or abrogated and often are with impunity for the violators.

(unseen), \$12.95. Donnelly explicates and defends an account of human rights as universal rights. Considering the competing claims of the universality, particularity, and relativity of human rights, he argues that the historical contingency and particularity of human rights is completely compatible with a conception of human rights as universal moral rights, and thus does not require the acceptance of claims of cultural relativism. The book moves between theoretical argument and historical practice. Rigorous and tightly-reasoned, material and perspectives from many disciplines are incorporated. Paper edition Annotation

International Human Rights examines the ways in which states and other international actors have addressed human rights since the end of World War II. This unique textbook features substantial attention to theory, history, international and regional institutions, and the role of transnational actors in the protection and promotion of human rights. Its purpose is to explore the difficult and contentious politics of human rights, and how those political dimensions have been addressed at the national, regional, and especially international levels. The fifth edition is substantially updated, rewritten, and revised throughout, including updates on multilateral

institutions (especially the UN's Universal Periodic Review process and the Human Rights Council's Special Procedures mechanisms), regional systems, human rights in foreign policy (including a specific chapter on U.S. foreign policy), humanitarian intervention and the "responsibility to protect," and (anti)terrorism and human rights. The book also includes a new chapter on the unity (indivisibility) of human rights. Chapters include discussion questions, case studies for in-depth examination of topics (including new case studies on the U.N. Special Procedures, Myanmar, and Israeli settlements in West-Bank Palestine), and ten "problems" (including new entries on the war in Syria and hierarchies between human rights) tailored to promote classroom discussion.

First published in 1985. In this study, Donnelly distinguishes between "having a right" and "being right" and elaborates the distinction with great subtlety to show that rights have to be understood as action and not as a possession. This is done with such clarity and good sense that he is able to cast light on all aspects of the often confusing discussions of the natures and usages of "right". He illuminates an astonishing range of issues, from the limitations of Thomist and utilitarian conceptions of right to the confusions of many present-day defenders of rights, both in the West and the Third World. As importantly,

Donnelly is centrally concerned with the human aspect of "human rights". He is thus able to rest his discussion of rights on a plausible philosophical anthropology as well as an appreciation of an historical dimension to human rights, and, at the end of his book, is able to open the door towards potential new developments in the discussion of human rights. Down the path he points us lies a reconciliation of the notion of individual rights with that of political community. This title will be of great interest to students of politics and philosophy.

United States by Robert Justin Goldstein.

Human rights, now a regular part of international relations, were not recognized as a legitimate subject of diplomatic concern prior to 1945. Jack Donnelly traces the rise of human rights issues after World War II, through the Universal Declaration of Human Rights, the dark days of the Cold War, the resurgence of interest during the Carter presidency, and the Reagan administration's resistance, up to the current post-Cold War era. Although concerned primarily with the international politics of human rights, the book includes a chapter on theoretical issues, including the moral basis of human rights, problems of cultural relativism, and the place of human rights in the contemporary international society of states. Case studies of human rights violations in Chile,

Argentina, South Africa, El Salvador, and Nicaragua, as well as extensive illustrations drawn from other parts of the world, lend concreteness to the discussion. Throughout the volume, Donnelly gives attention not only to the realist emphasis on power and international anarchy but also to the reality and impact of moral concerns, interdependence, international organizations, and nongovernmental organizations. Tables, boxes, photos, cartoons, and essential human rights documents accompany the text, along with features common to all Dilemmas in World Politics books—discussion questions, suggested readings, a chronology, and a glossary. International Human Rights is ideal for all levels of students in international relations, foreign policy, peace studies, international organizations, and law.

Leading scholars evaluate the philosophical basis of human rights, and the development of a global human rights culture.

In a troubled world where millions die at the hands of their own governments and societies, some states risk their citizens' lives, considerable portions of their national budgets, and repercussions from opposing states to protect helpless foreigners. Dozens of Canadian peacekeepers have died in Afghanistan defending humanitarian reconstruction in a shattered faraway land with no ties to their own. Each year, Sweden

contributes over \$3 billion to aid the world's poorest citizens and struggling democracies, asking nothing in return. And, a generation ago, Costa Rica defied U.S. power to broker a peace accord that ended civil wars in three neighboring countries--and has now joined with principled peers like South Africa to support the United Nations' International Criminal Court, despite U.S. pressure and aid cuts. Hundreds of thousands of refugees are alive today because they have been sheltered by one of these nations. Global Good Samaritans looks at the reasons why and how some states promote human rights internationally, arguing that humanitarian internationalism is more than episodic altruism--it is a pattern of persistent principled politics. Human rights as a principled foreign policy defies the realist prediction of untrammled pursuit of national interest, and suggests the utility of constructivist approaches that investigate the role of ideas, identities, and influences on state action. Brysk shows how a diverse set of democratic middle powers, inspired by visionary leaders and strong civil societies, came to see the linkage between their long-term interest and the common good. She concludes that state promotion of global human rights may be an option for many more members of the international community and that the international human rights regime can be strengthened at the interstate level, alongside social movement campaigns and the

struggle for the democratization of global governance.

Seeing the Myth in Human Rights explores the role of myth in the creation and propagation of the 1948 Universal Declaration of Human Rights. Drawing on records, publications, and speeches from the Declaration's creators as well as current scholarship on human rights, Jenna Reinbold sees the Declaration as an exemplar of modern mythmaking.

Selected by Choice magazine as an Outstanding Academic Book for 1999 Born of a shared revulsion against the horrors of the Holocaust, the Universal Declaration of Human Rights has become the single most important statement of international ethics. It was inspired by and reflects the full scope of President Franklin Roosevelt's famous four freedoms: "the freedom of speech and expression, the freedom of worship, the freedom from want, and the freedom from fear." Written by a UN commission led by Eleanor Roosevelt and adopted in 1948, the Declaration has become the moral backbone of more than two hundred human rights instruments that are now a part of our world. The result of a truly international negotiating process, the document has been a source of hope and inspiration to thousands of groups and millions of oppressed individuals.
