Salon owner Virginia Boca has declared herself celibate...at least until she wins the election for mayor of Bluelick, Kentucky. No hot men. No sex. And her plan to play the good girl might have worked—if the mysterious, hard-bodied stranger she's seen around town hadn't pulled her from the street and saved her life. The least Ginny can do is offer her savior a free haircut. But when an innocent haircut turns into hours of wickedly hot sex, former Navy SEAL Shaun Buchanan knows his plan to keep a low profile is shot. Especially once Ginny finds out he's the current mayor's son. With her reputation and the election on the line, Ginny seems determined to keep their nightly sexcapades a secret, but Shaun's not willing to stay in the shadows forever... practitioners interested in the outsourcing and offshoring of information technology and business processes. It offers a review of the key topics in outsourcing and offshoring, populated with practical frameworks that serve as a tool-kit for students and managers. The topics discussed combine theoretical and practical insights, and they are extensively illustrated by case studies from client and vendor organizations. Last but not least, the book examines current and future trends in outsourcing and offshoring, paying particular attention to the centrality of innovation in sourcing arrangements, and how innovation can be realized in outsourcing.

This monograph contains some of the papers presented at a UK-Japanese Workshop on Stochastic Modelling in Innovative Manufacturing held at Churchill College, Cambridge on July 20 and 21st 1995, sponsored jointly by the UK Engineering and Physical Science Research Council and the British Council. Attending were 19 UK and 24 Japanese delegates representing 28 institutions. The aim of the workshop was to discuss the modelling work being done by researchers in both countries on the new activities and challenges occurring in manufacturing. These challenges have arisen because of the increasingly uncertain environment of modern manufacturing due to the commercial need to respond more quickly to customers demands,

and the move to just-in-time manufacturing and flexible manufacturing systems and the increasing requirements for quality. As well as time pressure, the increasing importance of the quality of the products, the need to hold the minimum stock of components, and the importance of reliable production systems has meant that manufacturers need to design production systems that perform well in randomly varying conditions and that their operating procedures can respond to changes in conditions and requirements. This has increased the need to understand how manufacturing systems work in the random environments, and so emphasised the importance of stochastic models of such systems.

A scathingly funny debut novel about

disillusionment, indifference, and one man's desperate fight to assign absolutely no meaning to modern life. The only thing Shane cares about is leaving. Usually on a Greyhound bus, right before his life falls apart again. Just like he planned. But this time it's complicated: there's a sadistic corporate climber who thinks she's his girlfriend, a rent-subsidized affair with his landlord's wife, and the bizarrely appealing deaf assistant to Shane's cosmically unstable dentist. When one of the women is murdered, and Shane is the only suspect who doesn't care enough to act like he didn't do it, the question becomes just how he'll clear the good name he never had and doesn't particularly want: his own. "The malaise of cubicle culture may be well-trodden comedic territory by now, but Neilan's debut skewers office life with a flourish for the grotesque." -The Village Voice

It is 1941 and America teeters on the brink of war. Outgoing naval officer Ensign Jim Avery escorts British convoys across the North Atlantic in a brand-new destroyer, the USS Atwood. Back on shore, Boston Navy Yard secretary Mary Stirling does her work quietly and efficiently, happy to be out of the limelight. Yet, despite her reserved nature, she never could back down from a challenge. When evidence of sabotage on the Atwood is found, Jim and Mary must work together to uncover the culprit. A bewildering maze of

suspects emerges, and Mary is dismayed to find that even someone close to her is under suspicion. With the increasing pressure, Jim and Mary find that many new challenges--and dangers--await them. Sarah Sundin takes readers to the tense months before the US entered WWII. Readers will encounter German U-boats and torpedoes, along with the explosive power of true love, in this hopeful and romantic story.

A hedge fund manager who makes a fortune in an enterprise that murders people falls in love with a public relations expert, who in turn is pursued by a doctor and former Navy SEAL.
