18 Max flow formulation: assign unit capacity to every edge. Theorem. Max number edge-disjoint s-t paths equals max flow value. Pf. ≥ Suppose max flow value is k. Integrality theorem ⇒ there exists 0-1 flow f of value k. Consider edge (s, u) with f(s, u) = 1. –by conservation, there exists an edge (u, v) with f(u, v) = 1 –continue until reach t, always choosing a new edge
