Life On Earth Dot Point Answers

The fossil record tells us that life on Earth has lasted at least 3.5 billion years (the Earth is about 4.54 billion years old), with the oldest physical traces of life dating back 3.7 billion years. And, if some kind of disaster doesn't intervene, our planet should continue to host life for at least another 1.75 billion years.

A study of Earth ' s “ solar neighborhood ” finds over 1,000 solar systems have the perfect angle to view our planet. Study co-author Lisa Kaltenegger says their list focuses on main-sequence stars similar to the sun. These solar systems may contains exoplanets, Earth-like worlds sitting in the habitable zone for life.

Are aliens watching us? Many exoplanets may be able to see ...
A new study makes that point by identifying more than 1,000 nearby stars that are favorably positioned for spotting life on Earth.

Pale Blue Dot: What ' s the Point of It All? | by Zat Rana ...

Stare at the dot for any length of time and then try to convince yourself that God created the whole Universe for one of the 10 million or so species of life that inhabit that speck of dust. Now take it a step further: Imagine that everything was made just for a single shade of that species, or gender, or ethnic or religious subdivision.
