"Although I have been a hospice nurse for almost 19 years, I am not a counselor. However, I will be able to use some of the information I learned here to assist my patients and my colleagues with issues encountered during the difficult time when patients are dying and families are struggling with realities. I will definitely share this book with our bereavement counselors and social workers." Doing What Works in Brief Therapy: A Strategic Solution Focused Approach is both a set of procedures for the therapist and a philosophy- one that is shared with clients and one that guides the work of the therapist. This second edition continues its excellence in offering clinicians a guide to doing what works in brief therapy- for whom, and when and how to use it. Psychotherapy that follows these guidelines validates the client's most important concerns - and it often turns out to be surprisingly brief. Author, Ellen Quick integrates strategic and solution focused therapy and includes guidelines for tailoring technique and interventions to client characteristics and preferences. With clinically rich examples throughout, this book offers applications for couples, including indications for individual or conjoint sessions. Chapter summaries highlighting key points Presents ways of eliciting what clients most want to remember Describes the "Doing What Works Group," including outcome research findings and all materials needed to run the group Addresses the relationship among the positive psychology movement and this approach and the potential for collaboration Emphasizes an acceptance-based stance and how acceptance commonly leads to change Proposes that "doing what works and changing what doesn't" can provide a transtheoretical perspective for therapists of any orientation

Introduces a Powerful New Brief Therapy Approach This groundbreaking book is the first to provide a comprehensive model for effectively blending the two main postmodern brief therapy approaches: solution-focused and narrative therapies. It harnesses the power of both models-the strengths-based, problem-solving approach of SFT and the value-honoring and re-descriptive approach of Narrative Therapy--to offer brief, effective help to clients that builds on their strengths and abilities to envision and craft preferred outcomes. Authored by a leading trainer, teacher, and practitioner in the field, the book provides an overview of the history of both models and outlines their differences, similarities, limitations and strengths. It then demonstrates how to blend these two approaches in working with such issues as trauma, addictions, grief, relationship issues, family therapy and mood issues. Each concern is illustrated with a case study from practice with individual adults, adolescents, children, and families. Useful client dialogue and forms are included to help the clinician guide clients in practice. Each chapter concludes with a summary describing and reinforcing the principles of the topic and a
