Forty-eight beautiful full-color stereoscopic pin-ups from the 1950s come to life when viewed with the book's 3-D glasses.

## Great is no longer good enough. Beyond Great delivers a powerful new playbook of 9 core strategies to thrive in a post-COVID world where all the rules of the game are being re-written. Beyond Great answers to two fundamental questions which face business leaders today in a world shaped by daunting and disruptive technological, economic, and social change. First, what is outstanding performance in this new volatile era? Second, how do we build competitive advantage in a world with new and often uncertain rules? Supported by years of research and hands-on consulting practice, this book presents a comprehensive framework for building a high performing, resilient, adaptive, and socially responsible global company. The book begins by taking an incisive look at these disruptive forces transforming globalization, including economic nationalism; the boom in data flows and digital commerce; the rise of China; heightened public concerns about capitalism and the environment; and the emergence of borderless communities of digitally connected consumers. Distilled from the study of hundreds of companies and interviews with dozens of business leaders, the authors have distilled nine core strategies – the new winning playbook of the 21st century. Beyond Great argues that business leaders today must lead with a new kind of greatness, flexibility and light-footedness, constantly layering in new strategies and operational norms atop existing ones to allow for "always-on" transformation. Leaders must master a whole new set of rules about what it takes to be "global," becoming shapeshifters adept at handling contradiction, multiplicity, and nuance. This book will show them how.

Competition authorities are increasingly interested in understanding the impact of their activities on markets and consumers. The goal is to improve competition policy rules and decision-making practices and to get robust evidence on the benefits of competition and competition policy for society as a whole. Discussions with competition authorities, practitioners and academics have shown the need to take stock of the experience gained in this field by the European Commission and to present it in an easily accessible way. The studies collected in this volume – prepared by senior Commission officials and competition policy experts – range from the ex post evaluation of specific policy interventions to the assessment of the broader impact of competition policy. The issues and topics examined include the following: objectives and scope of evaluations by the European Commission; description of counterfactual evaluation techniques used; conditions for a successful ex post evaluation of a competition policy intervention; a wide selection of individual cases covering a variety of economic sectors; applications in merger control, antitrust and State aid; direct benefits of competition policy interventions for consumers; deterrent effects of such interventions on market participants; and macroeconomic outcomes in terms of job creation, productivity and GDP growth. This matchless book assembles within a single volume all that is needed for competition policy analysts and practitioners to undertake ex post economic evaluations. While its collection of state-of-the-art ex post evaluation studies has a clear value for competition authorities, it is sure to be welcomed as well by competition law practitioners in the private sector, who will greatly appreciate the effort made to cast a critical eye on decisions taken in the past. Moreover, it allows for addressing some of the new challenges facing competition policymakers. Fabienne Ilzkovitz is Principal Advisor responsible for the economic evaluation of competition policy within the Directorate-General for Competition of the European Commission, and since 2014, she has coordinated various ex post evaluation projects in the Directorate-General. She is also Associate Professor of Economics in the Solvay Brussels School of Economics and Management at the Université Libre de Bruxelles, Belgium. Adriaan Dierx is Senior Expert on ex post economic evaluation within the Directorate-General for Competition of the European Commission. He has managed a number of studies aimed at assessing the economic impact of the European Commission ' s competition policy interventions.

Barbara Kingsolver's acclaimed international bestseller tells the story of an American missionary family in the Congo during a poignant chapter in African history. It spins the tale of the fierce evangelical Baptist, Nathan Price, who takes his wife and four daughters on a missionary journey into the heart of darkness of the Belgian Congo in 1959. They carry with them to Africa all they believe they will need from home, but soon find that all of it - from garden seeds to the King James Bible - is calamitously transformed on African soil. Told from the perspective of the five women, this is a compelling exploration of African history, religion, family, and the many paths to redemption. The Poisonwood Bible was nominated for the Pulitzer Prize in 1999 and was chosen as the best reading group novel ever at the Penguin/Orange Awards. It continues to be read and adored by millions worldwide.

Want to clean a coffeepot in a flash? Unclog a sink with a simple homemade solution? Remove a stubborn stain? Let Her Royal Highness of housekeeping show you how to turn your home into a sparkling palace - in no time at all! Here comes the Queen of Clean, and her down-to-earth housekeeping guide for those of us who live in the real world. After all, the Queen has better things to do than be a slave to housework. That's why she has assembled a marvellous collection of miraculous cleaning tips and surprising shortcuts that get the job done quickly and well. Without a lot of fuss, you can solve hundreds of cleaning challenges in every room of your home: \* Remove dust, rust, gum, fingerprints, stains, odours and mildew \* Clean leather and upholstery, carpets, windows, walls, floors, kitchen appliances, grills and more The Queen counts her pennies too - with inexpensive, environmentally friendly cleaning concoctions and ingredients you might never expect. They include onion (a great rust-remover) lemon juice, vinegar, petroleum jelly, baking soda and tea - the wood cleaner you can drink.
