The Multi-Coloured Manual In the last four decades, FHRC has produced five Manuals bringing together information on the impacts of flooding and coastal erosion.

Multi-Coloured Manual | Middlesex University London

In MDX, the SELECT statement specifies a result set that contains a subset of multidimensional data that has been returned from a cube. To specify a result set, an MDX query must contain the following information: The number of axes that you want the result set to contain. You can specify up to 128 axes in an MDX query.

The Basic MDX Query (MDX) | Microsoft Docs

MDX is purely for analyzing and reading data. Similar to the way tables and columns are central to SQL, dimensions, hierarchies, and levels, are the centerpieces of MDX. They are mapping business models into language-specific concepts (e.g. a list of countries will be mapped as an MDX dimension). The most natural way to explain these concepts is with an example. Let's introduce a classic sales ...
