A natural disaster takes place in populated areas of the world when lives may be lost, the property is severely damaged, and the economy is negatively affected. Natural disasters may include an asteroid collision with Earth, avalanche, landslide, blizzard, thunderstorm, earthquake, flood, gamma-ray burst (from space), volcano, heat wave, hurricane, solar flare, drought, tornado, tsunami, hail, and wildfire. It is not a natural disaster if it occurs in an unpopulated area and there is no loss ...

resources. These classroom activities focus on flooding. A good range of activities with cross curricular links.

Natural Disasters | Teaching Resources

Natural disasters are naturally occurring events that cause destruction or severe weather changes. They happen all over the world depending on the location. Areas that are located mostly along the fault lines will experience earthquakes more often than others, while areas close to the ocean will likely experience a hurricane or flooding.

ESL video lesson with an interactive quiz: Deep listening comprehension . Students will watch the video and answer questions related to natural disasters and their impact on the world.

Natural Disasters - English ESL video lesson

Summary. Students are introduced to our planet's structure and its dynamic system of natural forces through an examination of the natural hazards of earthquakes, volcanoes, landslides, tsunamis, floods and tornadoes, as well as avalanches, fires, hurricanes and thunderstorms. They see how these natural events become disasters when they impact people, and how engineers help to make people safe from them.
