Provides a variety of approaches to transit bus service line and cleaning functions so transit agencies can evaluate the effectiveness of their own operations.

TRB’s Transit Cooperative Research Program (TCRP) Report 125: Guidebook for Mitigating Fixed-Route Bus-and-Pedestrian Collisions is designed to help assist small, medium, and large transit agencies and their community members in identifying preventative or remedial strategies for reducing the frequency and severity of bus-and-pedestrian collisions. The report explores strategies to mitigate collisions, includes case studies on the implementation of mitigating strategies, and highlights important considerations associated with improving pedestrian safety around transit buses.

The purpose is to document training practices at a sampling of transit agencies concerning the application and repair of advanced on-board electronics so that key personnel have the knowledge needed to make informed decisions. The objectives of the synthesis were to examine the level of E/E training being provided by transit agencies to highlight innovative and effective training approaches and, based on findings from the conclusions, to provide agencies with the opportunity to improve their training programs. Because maintenance is an area that is often overlooked, this synthesis gives it the greatest focus.
