"Damon Young's The Art of Reading is a brilliant, wide-ranging exploration of the nature and value of reading, a serious philosopher's serious game with literature. Witty and graceful it does what it sets out to do, to turn black text into an illuminated theatre of mind, heart and consciousness as it passes through the teasing virtues and vices of its main headings.

"Why do artists love books?" This volume takes this tantalizingly simple question as a starting point to reveal centuries of symbiosis between the visual and literary arts. First looking at the development of printed books and the simultaneous emergence of the modern figure of the artist, *The Art of Reading* appraises works by the many great masters who took inspiration from the printed word. Authors Jamie Camplin and Maria Ranauro weave together an engaging cultural history that probes the ways in which books and paintings represent a key to understanding ourselves and the past. Paintings contain a world of information about religion, class, gender, and power, but they also reveal details of everyday life often lost in history texts. Such artworks show us not only how books have been valued over time but also how the practice of reading has evolved in Western society. Featuring over one hundred works by artists from across Europe and the United States and all painting genres, *The Art of Reading* explores the two-thousand-year story of the great painters and the preeminent information-providing, knowledge-endowing, solace-giving, belief-supporting, leisure-enriching, pleasure-delivering medium of all time: the book.

A beautiful celebratory tribute to the powers of one of our most undervalued skills – an ideal gift for the avid reader. 'What you are doing right now is, cosmically speaking, against the odds.' As young children, we are taught to read, but soon go on to forget just how miraculous a process it is, this turning of scratches and dots into understanding, unease and inspiration. Perhaps we need to stop and remember, stop and learn again how to read better. Damon Young shows us how to do exactly this, walking alongside some of the greatest readers who light a path for us – Borges, Plato, Woolf. Young reads passionately, selectively, surprisingly – from superhero noir to speculative realism, from Heidegger to Heinlein – and shows his reader how cultivating their inner critic can expand their own lives as well as the lives of those on the pages of the books they love.

Reading is a revolutionary act, an act of engagement in a culture that wants us to disengage. In *The Lost Art of Reading*, David L. Ulin asks a number of timely questions - why is literature important? What does it offer, especially now? Blending commentary with memoir, Ulin addresses the importance of the simple act of reading in an increasingly digital culture. Reading a book, flipping through hard pages, or shuffling them on screen - it doesn't matter. The key is the act of reading, and it's seriousness and depth. Ulin emphasizes the importance of reflection and pause allowed by stopping to read a book, and the accompanying focus required to let the mind run free in a world that is not one's own. Are we willing to risk our collective interest in contemplation, nuanced thinking, and empathy? Far from preaching to the choir, *The Lost Art of Reading* is a call to arms, or rather, to pages.

A celebration of artworks featuring books and readers from throughout history, for the delight of art lovers and bibliophiles As every book tells a story, every book in art is part of an intriguing, engaging, and relatable image. Books are depicted as indicators of intellect in portraits, as symbols of piety in religious paintings, as subjects in still lifes, and as the raw material for contemporary installations. *Reading Art* spotlights artworks from museums and collections around the globe, creating a gorgeous, inspiring homage to both the written word and to its pivotal role in the visual world.

The new introduction and afterword bring fresh relevance to this insightful rumination on the act of reading--as a path to critical thinking, individual and political identity, civic engagement, and resistance. The former LA Times book critic expands his short book, rich in ideas, on the consequence of reading to include the considerations of fake news, siloed information, and the connections between critical thinking as the key component of engaged citizenship and resistance. Here is the case for reading as a political act in both public and private gestures, and for the ways it enlarges the world and our frames of reference, all the while keeping us engaged.

The internationally bestselling guide to "mind-reading" by influencing those around you via non-verbal communication, from human psychology expert Henrik Fexeus. How would you like to know what the people around you are thinking? Do you want to network like a pro, persuade your boss to give you that promotion, and finally become the life of every party? Now, with Henrik Fexeus's expertise, you can. *The Art of Reading Minds* teaches you everything you need to know in order to become an expert at mind-reading. Using psychology-based skills such as non-verbal communication, reading body language, and using psychological influence, Fexeus explains how readers can find out what another person thinks and feels- and consequently control that person's thoughts and beliefs. Short, snappy chapters cover subjects such as contradictory signs and what they mean, how people flirt without even knowing it, benevolent methods of suggestion and undetectable influence, how to plant and trigger emotional states, and how to perform impressive mind-reading party tricks. Fexeus gives readers practical (and often fun) examples of how to effectively mind-read others and use this information, benevolently, both in personal and professional settings.

Drawing on extensive interviews with ninety-four women prisoners, Megan Sweeney examines how incarcerated women use available reading materials to come to terms with their pasts, negotiate their present experiences, and reach toward different futures. Foregrounding the voices of African American women, Sweeney analyzes how prisoners read three popular genres: narratives of victimization, urban crime fiction, and self-help books. She outlines the history of reading and education in U.S. prisons, highlighting how the increasing dehumanization of prisoners has resulted in diminished prison libraries and restricted opportunities for reading. Although penal officials have sometimes endorsed reading as a means to control prisoners, Sweeney illuminates the resourceful ways in which prisoners educate and empower themselves through reading. Given the scarcity of counseling and education in prisons, women use books to make meaning from their experiences, to gain guidance and support, to experiment with new ways of being, and to maintain connections with the world.
