So is her ex, but then Gavin drops the bombshell: he wants to move on by winning her back. Unfortunately, he might already be too late. When he shows up to declare his intentions, Leah's on her way out the door for a date with someone else. Gavin won her heart once and he's determined to win that battle again, no matter the odds. "Promise me you'll love me after this?" Those were the words I asked my first love on a high school date. "Always, Vi," he told me before crushing his lips against mine. I gave him a part of me I can never get back that night. Even worse, I gave him my heart. That was four years ago. Back when I was young and naive. Back when I thought we' d always be together. He dumped me right after graduation and left me to join the military. He said I shouldn' t wait for him; it didn' t matter that I wanted to. I would have waited for him forever, but he threw me away and left me here in this small town. Now he' s home and says he wants me back. Second chances don' t work in love. No matter how much I wish I could erase what' s happened since he' s been gone... no matter how much I think of falling back into his arms... Once upon a time, he was everything to her, except for one thing: her future Christmas sparkles from every bough and window at the cozy Four Winds Ski Resort, where single mother Eden Kendall and her eight-year-old son are spending the holiday. A surprise marriage proposal from her boss' s son wasn' t on her Christmas list, but it' s the perfect excuse to get away and weigh her options. She never imagined her son' s ski instructor/Santa impersonator would be the gorgeous, charismatic dreamer she left behind years ago, the one who still owns a piece of her heart. Cole Hagan has never stopped loving Eden and he' s spent the last eight years proving her wrong on every count about his potential. While he fights to save the resort that he helped to build by organizing a holiday concert, he decides it' s about time that Eden puts aside her list-making pragmatism so that she and her skeptical son can experience the true magic of Christmas. Can a not-so-perfect angel help this unlikely pair get a second chance at happily ever after?

Build your own intelligent agent system... Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that intelligently search the Web buying and selling goods via electronic commerce, to autonomous space probes. This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources. Developing Intelligent Agent Systems not only answers the questions " what are agents? " and " why are they useful? " but also the crucial question: " how do I design and build intelligent agent systems? " The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology. Read on for: a practical step-by-step introduction to designing and building intelligent agent systems. a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents. PDT: Prometheus Design Tool – software support for the Prometheus design process. the example of an electronic bookstore to illustrate the design process throughout the book. Electronic resources including the Prometheus Design Tool (PDT), can be found at: http://www.cs.rmit.edu.au/agents/prometheus This book is aimed at industrial software developers, software engineers and at advanced undergraduate students. It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics. Familiarity with Java will help in reading the examples in chapter 10.

In this volume, a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences, with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice. Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit, the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced, heterosexual and homosexual, aristocratic and working-class and politically right and left. The contributors analyze cases shaped by their particular geographical locations, ranging from retreat settings like the English countryside and Woods Hole, Massachusetts, to university laboratories and urban centers in Berlin, Stockholm, Geneva and London. The volume demonstrates how the terms and meanings of collaboration, variably shaped by disciplinary imperatives, cultural mores, and the agency of the collaborators themselves, illuminate critical intellectual and institutional developments in the modern sciences.

Murder and depravity are Police Commissioner Amédée Mallock' s daily bread. As far as he is concerned, mankind has been thoroughly abandoned by God, and the visions that haunt him do nothing to disabuse him of this notion. But nothing he has encountered has prepared him for the sudden appearance of a serial killer dubbed " the Makeup Artist. " The bodies of the killer' s first victims, found in four separate neighborhoods of Paris, are monstrous works of art, baroque masterpieces of depravity, demented expressions of corrupted piety. These crimes are unprecedented in their ferocity and their intricacy, and the deeper Mallock investigates the greater the mysteries and the enigmas. There seems to be no tenable solution to this series of crimes behind which the devil himself seems to lurk. A supernatural and theological thriller, The Faces of God is superior fiction for fans of the TV series True Detective and of novels by writers such as Douglas Preston, Lincoln Child, and Dean Koontz.
