The fourth edition of Organisational Behaviour: Emerging Knowledge, Global Insights continues to be both relevant and engaging while providing clear explanations of emerging OB theories and concepts. A

range of practical examples prepare students for the changing global business environment. Individual, Team and Organisational processes taking into account self-concept, social networking and the need for creativity in organisations, as well as considering the business-wide issues including sustainability and business ethics, are covered in depth. Numerous real-life anecdotes are spread throughout the book illustrating how adopting a global mindset has become an important employee characteristic in this increasingly interconnected world. Interesting and thought-provoking real-world examples throughout the text illustrate concepts and motivate students to engage with the book's content. The book maintains a strong Pacific Rim focus while simultaneously presenting OB practices and anecdotes of international significance. Organisational Behaviour: Emerging Knowledge, Global Insights pioneers the view that OB is not just for managers; it is relevant and valuable to anyone who works in and around organisations.

Managing Academics contrasts three alternative perspectives of managing (professionalism, quality of worklife, prosocial identity) with the dominant perspective of managerialism in higher education institutions. The intention of the contrast is to: (1) challenge the notion that managing academics is a unitary, values-free process; (2) raise awareness of managing as a social process in which values and identity questions resonate as issues of importance to managers and the managed; and (3) help academic-managers influence and balance "hybrid" perspectives of managing and scholarship.

The IAAP Handbook of Applied Psychology, an up-to-date and authoritative reference, provides a critical overview of applied psychology from an international perspective. Brings together articles by leading authorities from around the world Provides the reader with a complete overview of the field and highlights key research findings Divided into three parts: professional psychology, substantive areas of applied psychology, and special topics in applied psychology Explores the challenges, opportunities, and potential future developments in applied psychology Features comprehensive coverage of the field, including topics as diverse as clinical health psychology, environmental psychology, and consumer psychology

An innovator in contemporary thought on economic and political development looks here at decline rather

than growth. Albert O. Hirschman makes a basic distinction between alternative ways of reacting to deterioration in business firms and, in general, to dissatisfaction with organizations: one, "exit," is for the member to quit the organization or for the customer to switch to the competing product, and the other, "voice," is for members or customers to agitate and exert influence for change "from within." The efficiency of the competitive mechanism, with its total reliance on exit, is questioned for certain important situations. As exit often undercuts voice while being unable to counteract decline, loyalty is seen in the function of retarding exit and of permitting voice to play its proper role. The interplay of the three concepts turns out to illuminate a wide range of economic, social, and political phenomena. As the author states in the preface, "having found my own unifying way of looking at issues as diverse as competition and the two-party system, divorce and the American character, black power and the failure of 'unhappy' top officials to resign over Vietnam, I decided to let myself go a little."
